Subject: Enquiry of Viamed Part#2510091
To: <office@viamed.co.uk>

Dear Sophie,

Good Day!

Regarding part#2510091. Could you please provide a quotation (other accessories included) and operation manual to us?

**Part number 2510091****Product name** TOF 3D Neuromuscular Transmission Monitor

Quantitatively monitors the level of neuromuscular transmission during surgery or in the intensive care unit, assessing the depth or degree of muscle relaxation

By means of 3 dimensional acceleromyography the TOF 3D quantitatively monitors the level of neuromuscular transmission during surgery or in the intensive care unit. The new TOF 3D is easy to use and in addition to the standard T there are alternative objective and subjective modes of stimulation available. The monitor's functions and menu can be quickly customised to meet your specific requirements.

Best Regards,
Rebecca Tang
