PRECISION MEDICAL®

PM5300 Series Low Flow Air/Oxygen Blenders

It's Unique

It is the only blender available that allows the clinician to turn the bleed control ON or OFF providing quieter operation. This feature is especially useful in the Neonatal and Paediatric Intensive Care settings.

It's Durable

The tough ABS housing provides unmatched durability. The setting knob is recessed to prevent accidental damage.

It's Versatile

The Blender is easily mounted with a universal mounting bracket. It can be detached from the mounting bracket without removing the hoses.

It's Modular

The unique modular design can cut routine maintenance time in half as well as reduce maintenance costs.

It's User Friendly

A large selection control knob makes oxygen percentage adjustments easy. The infection control friendly housing is smooth and easy to clean.

It's a High Performance Unit

The highly accurate unit maintains $\text{FiO}_2\%$ even at low flows. It is economical and provides cost savings with less waste. All models comply with EN10524-1.

Selecting your Low Flow Blender configuration

Work your way round from 1 to 6, selecting which parts you require for your Blender configuration. Note the part number required and supply to Viamed. Alternative use our online selector tool, www.viamed.co.uk/BlenderConfigurations.

Should the items you require not be listed please contact our sales team who would be happy to guide you through the process and help select the correct configuration for you.
