Infant Resuscitation Cabinet

Provides essential equipment for safe and easy infant resuscitation

- Wall mounted cabinet with antibacterial coating
- Wall mounted radiant warmer on articulated arm
- Tom Thumb Infant Resuscitation Unit
- Low suction controller
- Vacsax suction receiving system, utilising disposable liners
- Resuscitation platform manufactured from waterproof construction board
- Wide bed (35cm), designed to prevent mattress movement
- Sealed mattress, manufactured to BS5852 (Crib5) standards
- Digital Apgar Timer, audible indication at 1, 5 and 10-minutes
- Storage bins
- Air/Oxygen Blender (optional)

The Viamed Infant Resuscitation Cabinet offers an economical, convenient solution for the delivery room.

Compact and discreet, the cabinet is unobtrusive when not in use, yet facilitates the essential equipment for safe and easy resuscitation.

The cabinet is available in several configurations matched to your particular needs. An overhead radiant warmer mounted on an articulated boom arm conveniently and safely folds away when not in use.

The whole installation has a low profile and is ideally suited to even the smallest delivery rooms.

VIAMED

Infant Resuscitation Cabinet

Features

- Low profile, discreet: cabinet can be closed when not in use
- Economical; several delivery rooms can be equipped for the cost of a traditional mobile unit
- Provides a permanent, always ready solution for each individual delivery room
- Easy to operate, safe and fatigue-free resuscitation
- Optional air/oxygen blender for delivery of mixed gases
- Bacteria resistant, waterproof resuscitation platform and antibacterial coating on cabinet

Cabinet

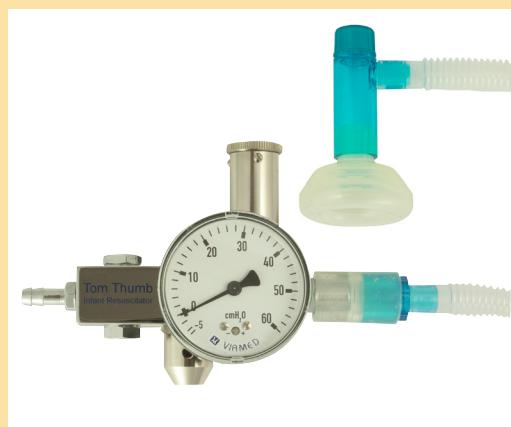

| | |
|---------------------|---|
| Dimensions | 660mm (Height), 650mm (Width), 280mm (Depth) |
| Weight | 19kg (empty), 25kg (with standard accessories) |
| Medirails | 3 (1 x 300mm, 2 x 400mm) |
| Shelving | Integral shelf and 3 bin rails |
| Storage | 3 storage bins (blue, size 3 Lin bin) |
| Bed | Flat, 35cm (14") wide |
| Mattress | Sealed design, manufactured to BS5852 (Crib5) standards |
| Digital Apgar Timer | Preset audible indicators at 1, 5 and 10-minute intervals |

Infant Resuscitation Cabinet system shown mounted on wall strengthening pargett board

Tom Thumb Infant Resuscitation Unit

| | |
|--------------------------|---|
| Connection | 3m hose to wall oxygen outlet |
| Flowmeter | Integral, 0 - 15 litres/min (option without flowmeter also available) |
| Pressure | Adjustable, provides complete control |
| Emergency blow-off valve | Factory set to a fixed, predefined pressure level |
| Patient circuit | One NeoPEEP variable PEEP resuscitation circuit included |
| Tom Thumb | TT480 for connection to an existing flowmeter or air/oxygen blender |

TT480 Tom Thumb with NeoPEEP resuscitation circuit and mask

Low Suction Controller

| | |
|----------------------------|--|
| Suction | Variable, 0 - 150 mmHg (relief valve at -180 mmHg) |
| Scaling | Dual, -kPa and -mmHg |
| Connection to wall suction | 3m hose with BS probe |
| Receiving jar | 1 litre reusable Vacsax with disposable liner |

Choice of Low Suction Controller:

Oxylitre S7 series

Therapy Equipment 7725 Diamond series

Ceratherm 600-3 Radiant Warmer

| | |
|--------------------|---|
| Power requirements | 230V ±10%, 50 - 60Hz |
| Power rating | 620VA |
| Element | Ceramic, 600W. Efficient with fast warm up |
| Output | LED, 3W/700mA/4.5V, dazzling-free illumination of work area |
| Lighting | Audible and visual, 15 minutes with reset function |
| Alarms | Wall mounted articulated arm, folds away when not in use. |
| Mounting | Mobile radiant warmers also available |
| Certifications | IEC 601-2, CE0123 |

Optional Air/Oxygen Blender (Low flow)

| | |
|----------------|-------------------|
| Flowmeter | 0 - 15 litres/min |
| Oxygen % Range | 21 - 100% |

Air/Oxygen Blender (Optional)
