VersaStream[®]

Oridion Compatible Gas Sampling Lines

Innovative Solutions for Sidestream Gas Monitoring

The VersaStream[®] CO₂ sampling lines combine reliability, flexibility and cost efficiencies

Compatible to the FilterLine[®] range of sampling lines and for use with Microstream[®] enabled capnograph and patient monitors.

For use with Oridion (Medtronic/Covidien/Nellcor) capnographs, as well as capnographs and patient

monitors from other manufacturers that incorporate Microstream[®] technology, such as Philips, Dräger, Nihon Kohden, Physio Control, Zoll...

Why VersaStream[®] gas sampling lines?

- Cost-effective alternative to Nafion[®] tubes.
- The gas-selective non-porous material facilitates fast and complete removal of condensation from the sampling line.
- The integrated bacterial filter prevents contamination.
- Reliable measured gas values, due to negligible dead space volume of the filter - even in cases of high respiration rates.
- Integrated bacteria filter and water removal reduces the number of patient circuit parts and speeds up patient monitoring preparation time.

Innovative material technologies

- Latest material technologies permit active and complete removal of moisture and water – even in cases of low temperatures and high humidity.
- No need to use expensive Nafion[®] tubes, which are not resistant to bending.
- VersaStream[®] gas sampling lines are very flexible and are suitable for short-term and long-term applications

Nasal/Oral Cannula

Airway Adapter Sampling Line

Reduction of contamination risks

The integrated bacteria filter of the VersaStream® CO₂ sampling lines prevent contamination of gas-conducting components in and at the patient monitor. Transmission of germs, e.g. by contamination at the sample gas connection port of the monitor is prevented.

VersaStream®

LDS filter – Low-dead-space bacteria filter

Reliable measured values – even in cases of high breathing or ventilation frequency

The dead space volume of the filter unit has been reduced to only a few micro litres, thus facilitating precise measurement of CO₂ concentrations in the breathing gas – even at high respiration rates.

Diverse areas of application

VersaStream® gas sampling lines are suitable for use in areas, such as:

- Short and long term patient monitoring applications
- Monitoring of intubated and non-intubated patients
- Emergency medicine
- Patient transport
- Anaesthesia
- Intensive-care medicine – for adults and children
- Sedation
- Pain therapy, pain therapy management
- Homecare
- Sleep clinics and CPAP-ventilation
