positive results for life™

Omnistream™ End-tidal CO₂ Sampling Lines

FEATURES

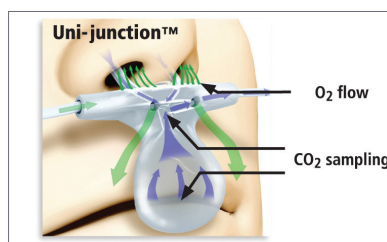

- Uni-junction™ technology is designed to ensure proper sampling for patients who alternate between oral and nasal breathing
- Improved sampling accuracy can mean a reduction in false “no breath” and low respiration rate alarms
- Oral Scoop design has wide surface area to provide breath capture even in the presence of shallow breathing
- Unique oxygen delivery provides comfort to the patient during oxygen administration without dilution of etCO₂ sample
- A broad portfolio of patient interfaces are available

Enhance etCO₂ Monitors with Omnistream Sampling Lines

Omnistream sampling lines are compatible with many patient monitors, including, but not limited to:

- General Electric
- Datex-Ohmeda
- Welch Allyn
- Spacelabs
- Nonin
- Smiths Medical/BCI

Omnistream sampling lines are compatible with most sidestream etCO₂ monitors. Patented Uni-junction™ technology is engineered to enhance etCO₂ sample quality by offering both oral and nasal sampling while delivering supplemental oxygen. Omnistream products can be identified by the standard blue luer connector.

Nasal and oral sampling via patented Uni-junction technology

Oral Scoop surface area captures quality samples from mouth breathers
