VM-2160 and VM-2160 SMARTsat devices

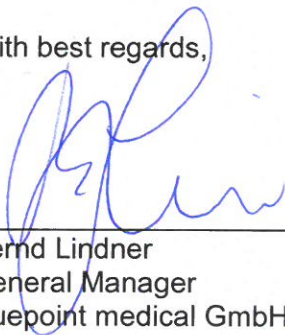

To Whom it May Concern,

Bluepoint Medical and Viamed have been product development partners since 2008. Included as part of this is the VM-2160 and latterly the VM-2160 SMARTsat range of pulse oximeters.

In order to comply with the latest medical device standards, we can now only have one set of official technical files, so in this case they are held by Bluepoint Medical.

The result of this is that Bluepoint Medical is stated as the official manufacturer of both the Viamed (VM-2160 SMARTsat range) and Bluepoint Medical (OxyTrue A SMARTsat range) variants. There are differences between the ranges and both manufacturers sell their own variants through their own sales channels

With best regards,

Bernd Lindner
