Ref: 20181107/511

Dear Sir or Madam,

In line with our ISO standards procedures, please find below notification of price list updates to the **Air & Oxygen Blenders**, effective as of the 1st January 2019.

Part Number	Description	Price
0310200	Low-Flow Blender Air & Oxygen with flowmeter and Medirail Mount	£????.???
0310201	Low-flow blender only	£????.???
0310205	High-flow blender with flowmeter and Medirail mount	£????.???
0310206	High-flow blender only	£????.???

This revised pricing is due to high increases in both manufacturing and transportation costs. We are actively seeking alternative lower cost manufacturing that complies with our ISO and CE certifications; and that also meets with the requirements of and changes to the Medical Device Directive. We will, of course, keep you updated should a viable alternative become available.

Should you require further information, please do not hesitate to contact a member of our team on 01535 634 542; between 09:00 and 17:30

Yours sincerely

Catrin Hollings
