Hi Ryan,

Just one question regarding the new samples we've requested. The previous samples are slightly shorter it seems than our usual sampling lines. I'm told that this can have an effect on Fet% reading. I believe the standard length is 2.2m, is it possible to get samples of this length?

On a different note, I had our meeting with our CEO from Sweden last week and explained the tests we were running and the plan going forward for field tests and further compatibility tests. He is fully on board and eager to make the change to Viamed assuming the upcoming tests are successful and wants to push it along as soon as possible.

Kind regards,

Lyes

Hi Lyes

Thank you very much.

I will discuss your report with my colleagues on Monday and get back to you with the pricing information for the samples.

Please have a great weekend.

Best regards

Ryan
