

## MANAGEMENT REVIEW VIAMED 2019

Client PC windows 7 going out of Support  
Meaning Opera in its current form will not run.

Accounts System Opera requires replacing.

Link between Opera and Intrastats needs to be analysed broken down, and what ever system comes in its place needs to work with intrastats.

Website requires updating PHP7/Mysqli –  
php5.3 has been Valid for approximately 12 Years and only in the last year or so has it been recommended to update.

No reason to suspect 7.xx will requiring updating code for a similar amount of time

VST is PHP7 Compliant,  
Vandagraph.co.uk is current;y on 5.3  
Vandagraph.com has a new system in place which is php7 Compliant.

Viamed is currently on 5.3 – waiting on vandagraph.com to decide on how to switch

Intrastats is on 5.3 and does require a major recode. This is underway See Report  
Intrastats Upgrade.pdf  
4252 Files require updating.

ALL Windows Clients need upgrading in 2020, after the accounts package has been updated.  
Once confirmation the Accounts has moved, Most clients in the building will be able to move away from Microsoft Windows.
