

# Envitec Oxygen Sensors Medical Vi

A medical device for measuring the proportion of oxygen in respiration gases.

Class IIa  
Via Rule 10  
Assesment Route Annex II

Carried out by Derek Lamb  
24 / 07 / 19

# Stock References Review

Stock Reference	Description
0110014	Oxygen sensor R-15V
0110018	Oxygen sensor R-17V
0110019	Oxygen sensor R-17Vi
0110020	Oxygen sensor R-22Vi
0110021	Oxygen sensor R-22MEDV
0110023	Oxygen sensor R-23V
0110025	Oxygen sensor R-23Vi
0110039	Oxygen sensor R-22VA.
0110040	Oxygen sensor R-30V
0110041	Oxygen sensor R-41V
0110042	Oxygen sensor R-42V
0110043	Oxygen sensor R-43V. Pack of 2 sensors.
0110044	Oxygen sensor R-44V
0110045	Oxygen sensor R-45V
0110047	Oxygen sensor R-47V
0110048	Oxygen sensor R-48V
0110049	Oxygen sensor R-49V
0110058	Oxygen sensor T-7V
0110071	Oxygen sensor R-22MEDV. Pack of 2
0110072	Oxygen sensor R-22Vi. Pack of 2
0110073	Oxygen sensor R-22VA. Pack of 2
0110075	Oxygen sensor R-75V
0120100	'T' adapter. 22mm I.D. - 22mm O.D.

Comments on Stock references review:

includes a few automotive sensors,  
will create a follow on issue to populate the new envitec automotive tech files and remove the included  
automotive sensors from this list.  
Follow up Issue #150203

Date Created 05/Jul/2019

Issued To: Steve Hardaker

Completed Status: Still Outstanding

---

### Notes:

Added by Steve Nixon sent to Steve Hardaker

Further to discussions with Envitec and as updated earlier.

In January Envitec changed the cathode from gold standard size to a smaller format platinum version. This was done to improve linearity (at higher output) and to try and improve life in use (due to smaller current). Trial sensors appeared to work.

With recent batches Envitec thought that the outputs were too high, so they lowered them by adjusting the electrolyte concentration.

It is now thought that the higher input impedance of the GE equipment lowers the effective output below the threshold (25 mV) of the equipment.

Envitec sensor specification: 25 - 39 mV

IT Gambert sensor specification: 25 - 35 mV

Envitec will now produce sensors with the lower QA output level of >31 mV. So if there is extra loading, the output reduction will be within the limits of the equipment.

After review of the GE service manuals it appears that the output of the sensors can be/should be much higher, see points 1 -4 below:

1) The sensors generate a voltage of about 40 millivolts at 21% oxygen concentration and about 200 millivolts at 100% oxygen concentration.

2) Servo oxygen unit has never been calibrated. Unit will not operate until initial calibration is performed. Cell voltage less than 33 mV.

3) (23 - 280 mV = 21 - 100% O<sub>2</sub>)

4) Calibration failed:

In calibration mode, after 5 minutes both sensors are not reading between 23 and 55 millivolts so the unit cannot calibrate.

### Oxygen probe failure:

One of the sensors is reading out of range (23 - 280 millivolts) or the difference between the two O<sub>2</sub> sensors is above 3%

Envitec will supply higher output sensors for testing. After further review of the historical data and GE documentation it appears that we should supply sensors circa 40 mV. This will be discussed further with Envitec.

---

05 Jul 2019 Steve Nixon

The current Envitec sensor specification is 25 - 38 mV, not 25 - 39 mV

---

05 Jul 2019 Steve Hardaker

Of the pairs received back having failed to calibrate, the highest were:

31.8 - 29.4 mV

30.8 - 29.3 mV

So, from this, it would appear that our current best guess at a minimum threshold is 29.4 mV (but could be higher).

Envitec setting them at 31 mV would only work if there is no voltage drop due to impedance, as this is very close. If there is still a voltage drop, I would suggest we need to see them up nearer to GE's typical spec of 40 mV.

0110041 R-33VAN-2

0110042 R-33VAN-3

---

05 Dec 2018 Ryan Swaine

As far as I am concerned, nothing has changed since our discussions in 2017/2018.

If Envitec can supply a high output sensor (25mV +/-2) then we would be happy to place orders for them. I was lead to believe that this was already being worked on.

As discussed, it seems logical to start with the R-33DE, as we have a good number of sales (approx 500/year) and it is currently being re-worked by MG & PC from an R-33S1.

With regards to how soon we would place an order, we would be happy to place an order as soon as Envitec are ready to supply.

Please note that the PCB is exposed on these sensors, please can we have them with PCB's that do not have any reference to Envitec on them. Alternatively, MG can remove this, but we would prefer not to add any unnecessary process`/labour.

VANDAGRAPH Stock Meeting - Production Requirements  
**2019 Projects - R-33 variants manufactured by Envitec**

Issue ID #133581

Date Created 04/Dec/2018

Issued To: Derek Lamb

Completed Status: 24 Apr 2019

---

Notes:

Copy Issue Main Issue #133580

Added by Steve Nixon sent to John Lamb

Can you please indicate which variants that you wish to proceed with during 2019 and indicate the earliest that you would envisage placing an order for the initial sensors.

0110214 R-33S  
0110215 R-33S1  
0110224 R-33DE  
0110226 R-33VAN  
0110235 R-33VAN-4  
0110036 R-33S1 (RP)  
0110039 R-33VAN (RP)  
0110041 R-33VAN-2  
0110042 R-33VAN-3

---

15 Apr 2019 Steve Nixon

General `rule of thumb` for DCR label changes etc. is 500 sensors per annum.

NOTE: The R-33 series sensors have higher outputs than usual sensors. This is more of a challenge in terms of linearity and is probably an NBO project.

I was under the impression that Vandagraph`s requirements covering all R-33 variants is circa 800-900 sensors. They will probably initially buy one variant as a base sensor.

Provisional pricing from Envitec is EUR 20.00 based on 1,000 sensors per year. This is further to the following that I provided to Jessica Wagner:

Two appropriate versions to start with could be:

0110224 R-33DE &#062;500 / year  
0110215 R-33S1 &#062;300 / year

Altogether there are 9 variants of R-33 sensors.

.....

Envitec do have limited resources, the R-33 development was to be the next sensor development. They have also had audit responsibilities and have helped us with our files, contracts and labelling artwork.

Recent projects have included:

JFD low-mag sensor  
JJ-CCR digital sensor  
r-Evo digital sensor.  
Shearwater digital circuit.  
Lead-free sensors.

---

16 Apr 2019 Derek Lamb  
created project file, and sent questions to jnj

---

16 Apr 2019 Steve Nixon  
Suggest that either Jean gets back to them or if she wishes I can keep it in motion. As discussed in principle the Honeywell managers have agreed that the project can proceed: Product, ISC Production, R&D, QA, Sales.

If they can achieve the high output I suggest that the project will take circa six months.

I would suggest placing a blanket 'call-off' order for say 800 sensors. Can be called off in small quantities such as 100 per batch.

---

20 Sep 2018 Robert Connor

Ok, I will have a look at the stock on the shelf and label stuff appropriately.

---

27 Sep 2018 Robert Connor

WIP making locations now.

As a temporary measure I have affixed hold stickers to the above stock to reserve the minimum amount, quoting see DL/SN before picking.

---

27 Sep 2018 Robert Connor

Saved locations;

0110432

LOC 126705 - 100 sensors - 00013052 JJS Manufacturing

LOC 126687 - 100 sensors - 00009081 The Automation Partnership

0110021

LOC 126699 - 100 sensors - 00012240 Inspiration Medical

LOC 126693 - 100 sensors - 00012812 Spectrum Medical

0110047

LOC 126691 - 50 sensors - 00012240 Inspiration Medical

0110122

LOC 126688 - 500 sensors - 00020015 Continental

---

27 Sep 2018 Robert Connor

Next Action Changed From Robert Connor To Derek Lamb For practical purposes I think it may be difficult to manage multiple saved locations for stock items as we'd be constantly shuffling old stock onto non-saved shelves and booking new stock to the reserve. This could potentially confuse people booking in stock and may result in newer stock jumping ahead of older in the normal sellable shelf.

---

29 Oct 2018 Derek Lamb

I believe we have this stock under control now,  
see reporting page : Stock Menu Stock Analysis - Stock customer reserved locations

21 Sep 2018 Derek Lamb

added 3 fields to the stock location index, ready for stk ref, qty, and account

will work with robert to get the above list some locations, then i can code up a monitoring screen

02 Oct 2018 Derek Lamb

Added a new report screen,

early days but its a start,

Stock - Stock Analysis - Stock Customer Reserved Locations

it shows the stock reference the stock qty and the customer,

on both the quick lookup screen and the big all in one stock screens the reserve amounts and customers should now be visable,

added a rolling issue once every 2 weeks to robert to check the stock qtys

thinking if we check often we should not have to keep a dedicated shelf or a non sellable shelf.  
will see how it goes for a few weeks.

Notes:

13 Feb 2019 04:37:58 PM Zoey Teal

Please part ship.

19 Feb 2019 09:27:49 AM Steve Hardaker

See Attached Notes

Cathy, there's a note on this order from last Wednesday saying OK to part ship. The R23 and R30V are both in stock, any reason why they can't go?

---

19 Feb 2019 Catherine Spence

I missed it by mistake, i sorted it out first thing this morning

VIAMED Stock Meeting - Purchase Order Requirements  
**Call-off orders for R-22MEDV for Spectrum Medical**

Issue ID #106167

Date Created 20/Oct/2017

Issued To: Steve Nixon

Completed Status: 18 Sep 2018

Linked Files

20 Oct 2017 Purchase order P1701327

---

Notes:

Added by Steve Hardaker sent to Steve Nixon

Spectrum Medical has placed a forward order for 280 x 0110021 to be called off in 4 drops. Please can you ensure stock is in the pipeline, allocated to their orders, thanks.

PO attached for reference, our ORDs and due dates are as follows:

ORD88950 - 70 to arrive Mon 15/1/18

ORD88952 - 70 to arrive Mon 16/4/18

ORD88953 - 70 to arrive Mon 16/7/18

ORD88954 - 70 to arrive Mon 16/10/18

---

18 Sep 2018 Steve Hardaker ORD88950 - 70 to arrive Mon 15/1/18 - DELIVERED ON TIME

ORD88952 - 70 to arrive Mon 16/4/18 - DELIVERED ON TIME

ORD88953 - 70 to arrive Mon 16/7/18 - CALLED FORWARD TO 16/4 BUT INSUFFICIENT STOCK - PART SHIPPED

ORD88954 - 70 to arrive Mon 16/10/18 - CALLED FORWARD TO 23/8 +25 MORE.

Added issue 128216 to SN to ask for increase in stock levels to account for them calling orders forward, which Steve Turner (CEO) said they need to do from time to time.

Closing this off as these are all now delivered.

Issue ID #147019

Date Created 11/Jun/2019

Issued To: Ryan Swaine

Completed Status: 17 Jun 2019

---

Notes:

Added by Derek Lamb sent to Ryan Swaine

Can you chase up on your sale or return issues

---

17 Jun 2019 Ryan Swaine

Done. However, please can you help me with the following.

These two items are scanned to me, I have no idea why, as I do not have them. Please can you kill them:

8438890110023Oxygen sensor R-23VV013195

2896152510000Microstim DB3 - Supramaximal NerveH0001915

Jamjoom have the following items scanned to them. They were left with a sales rep after the Saudi Health exhibition to follow up on some leads for me, I was to collect them on my next visit. Unfortunately the market changed that year and I never made it back to collect the devices, please kill them as they will be dead now and the products are no longer available.

VIAMED Sales And Marketing - Customer Database Updates

**Customer Requirement Ceased R-23V**

Issue ID #135802

Date Created 09/Jan/2019

Issued To: Derek Lamb

Completed Status: 11 Jan 2019

---

Notes:

Added by Catrin Hird sent to Derek Lamb

Customer has responded to a mailing group to state they do not have requests for the R-23V. I am wanting to note this on the system.

I have put on as a call on their contact page but is it possible to tag as requirement ceased in Lost Customers on just one product or will it red out on other lost customer pages?

Example a/c Hospimed 00007382 pn 0110023

---

10 Jan 2019 Derek Lamb

I'm 90% sure the lost customers is tied to the part number, there are already records in the system with the tag requirement ceased, so yeah think you can just tag it as such in the existing system,

---

11 Jan 2019 Catrin Hird

Fab, I have updated the above account as requirement ceased for R-23V. I have checked against other products they are lost customers for and it has not tagged these as the same so this works well. Thanks

---

## **Distributor Agreements Screen**

Issue ID #124497

Date Created 23/Jul/2018

Issued To: Derek Lamb

Completed Status: 23 Jul 2018

---

### Notes:

Added by Catrin Hird sent to Derek Lamb

I have had a query from a customer regarding a sensor so I wanted to check whether they were a registered distributor against the product. So I went to 0110047 and pressed the hand shake icon.

This took me to the screen which showed the customers... great it showed ABB Medtec but when I clicked into the account number it brought up the CRM account for the I account which showed the distributor agreements but doesn't show the contacts attached to it.

I thought it might have been in the button but as the other buttons to show the contacts isn't there I'm not sure.

I've gone directly into the records from the CRM and clicked the distributor handshake button and it brings up with agreements but no icons.

Maybe for ease can you just add the icons to this section?

---

23 Jul 2018 Derek Lamb

come round some point youve confused me :)

---

23 Jul 2018 Catrin Hird

Please put CRM icons on the distributor agreements page for each CRM record.

**Envitec MySign O Oxygen Monitor**

Issue ID #142332

Date Created 10/Apr/2019

Issued To: Steve Hardaker

Completed Status: Still Outstanding

---

Notes:

Copy Issue Main Issue #142330

Added by Steve Nixon sent to Catrin Hird

As discussed please prepare technical and marketing files for the MySign O.

Catrin, please generate a leaflet and section on the web site.

I'll confirm the pricing soon. I have provisionally added a Euro distributor price (for Medivent via Ryan).

Opera Envitec

Documents from email linked to issue.

Awaiting reply to SJH email to SN regarding use of device when connected to power supply. - 12/04/19  
09:44

If I'm reading the other email from Jessica correctly, the unit can be charged via USB or mains power supply when connected to the patient but can not be charged via USB when connected to the patient??

There is a charge time stated on the leaflet as 4 hours, is this applicable to the mains and USB or do they charge at different rates?

What is the warranty of the device, the sensor is 15 months as per existing literature?

If you would like me to ask Jessica directly these questions please let me know.

Also price missing for 0131900 USD end user. Are the rest of the prices now correct?

---

16 Apr 2019 Catrin Hird  
Linked to marketing job for leaflet.

---

16 Apr 2019 Steve Nixon  
Awaiting PSU statement from Envitec.

Added 0131900, also added missing 0131901.

---

16 Apr 2019 Catrin Hird  
0131901 Rechargeable spelt incorrectly, should be rechargeable.

HI JC

Please can I have the following for the relevant images:

0110014 Product Label and Product fully boxed  
0110018 Product Label and Product fully boxed  
0110019 Product Label  
0110020 Product Label and Product fully boxed  
0110025 Product Label and Product fully boxed  
0110039 Product fully boxed  
0110040 Product Label and Product fully boxed  
0110042 Product Label  
0110045 Product fully boxed  
0110047 Product fully boxed  
0110048 Product fully boxed  
0110049 Product fully boxed  
0110058 Product Full Boxed  
0110075 Product Label and Product fully boxed  
0110072 Product Label  
0110071 Product Label and Product fully boxed  
0110073 Product Label and Product fully boxed

I also need to have all the sensors listed on the related issue for marketing photography. These will probably be when we have them back in for warranty replacement or disposal.

I shall print a sheet and leave a copy in Goods In, with Emma for repairs, in the main office and by the disposal bin for everyone to see.

Any problems please let me know

Thanks

Copy Issue Main Issue #144615

Added by Steve Nixon sent to Derek Lamb

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

The initial ranges of 'lead free oxygen sensors have been added to Opera and Intradstats. Provisional pricing will be added soon.

Sensors manufactured by Envitec (8 sensors so far) will have part numbers in the range of 01108xx. The model numbers incorporate the letters LF (Lead Free).

Sensors manufactured by IT (International Technologies) Gambert (15 sensors so far) will have part numbers in the range of 01107xx. The model numbers of the medical sensors are prefixed by the letters: MLF (Medical Lead Free)

There is one sensor marketed by Maxtec: MAX-15LF (0110467).

You can use the Intastats cross reference to assist in finding the appropriate oxygen sensor:

IntraStats/Lookup/X Cross References/ General Cross Reference Guides.

In the group 'pull down' select oxygen sensors.

Example 1.

To find the oxygen sensor for the GE Carestation, type in Carestation in the Keywords search field and it should direct you to 0110705, which is the MLF-19 manufactured by IT Gambert.

Example 2.

You can also find 'lead free' alternatives. Type in R-22VA and one of the options in the displayed search results will be 0110702, which is the MLF-12A manufactured by IT Gambert. This sensor is the RoHS compliant, lead free alternative to R-22VA (0110039). Typing in 0110039 in the search field should also direct you to 0110702.

Example 3.

To find the 'lead free' alternative for one of the standard Envitec sensors, type in OOM110. One of the options will be the 0110803 OOMLF110, which is the RoHS compliant lead-free version of OOM110.

INFORMATION ONLY ISSUE DO NOT ADD NOTES!

The initial ranges of 'lead free oxygen sensors have been added to Opera and Intradstats. Provisional pricing will be added soon.

Sensors manufactured by Envitec (8 sensors so far) will have part numbers in the range of 01108xx. The model numbers incorporate the letters LF (Lead Free).

Sensors manufactured by IT (International Technologies) Gambert (15 sensors so far) will have part numbers in the range of 01107xx. The model numbers of the medical sensors are prefixed by the letters: MLF (Medical Lead Free)

There is one sensor marketed by Maxtec: MAX-15LF (0110467).

You can use the Intastats cross reference to assist in finding the appropriate oxygen sensor:

IntraStats/Lookup/X Cross References/ General Cross Reference Guides.

In the group 'pull down' select oxygen sensors.

#### Example 1.

To find the oxygen sensor for the GE Carestation, type in Carestation in the Keywords search field and it should direct you to 0110705, which is the MLF-19 manufactured by IT Gambert.

#### Example 2.

You can also find 'lead free' alternatives. Type in R-22VA and one of the options in the displayed search results will be 0110702, which is the MLF-12A manufactured by IT Gambert. This sensor is the RoHS compliant, lead free alternative to R-22VA (0110039). Typing in 0110039 in the search field should also direct you to 0110702.

#### Example 3.

To find the 'lead free' alternative for one of the standard Envitec sensors, type in OOM110. One of the options will be the 0110803 OOMLF110, which is the RoHS compliant lead-free version of OOM110.

Issued To: General  
Completed Status: 02 Apr 2019

---

Notes:

Added by Catrin Hird sent to Steve Hardaker  
00005030

Have you any indication why Sherwood Forest Hospital NHS FT have stopped purchasing R-48V.

Purchased MAX-3 until Feb 2018, tried R-48V in March 2018 and not purchased either since.

Continuing to purchase other sensors.

---

29 Mar 2019 Steve Hardaker

See issue 135308: they have replaced most of their Penlon anaesthetic machines with the GE Carestation 650, which uses a lead-free sensor for which we dont currently have an equivalent.

Next Action Changed From Steve Hardaker To Derek Lamb Thanks

Derek, I`ve gone to note this on the lost customers and the account is no longer showing in the lost customers?

Looks like I state requirement ceased in January but don`t understand why showed a few days ago in the list but not now.

---

29 Mar 2019 Derek Lamb

not sure i`ll be able to track down why they not on a list.

maybe you checked the list mid update of opera intrastats, as it does use this data to produce the lists

---

29 Mar 2019 Catrin Hird

Ah ok.... is it possible to get to that screen some other way so that I can check it states requirement ceased for 0110048?

---

29 Mar 2019 Catrin Hird

Its fine I`ve seen it and yes I have :)

They hadn`t ordered any though so should show?

---

13 May 2019 Gail Bell

Next Action Changed From 86 To Catrin Hird Morning Catrin, all these are done now apart from 00006397  
Ryan said to leave because it was Iran

00007468 Oxylink, Ryan said to leave

00012981, NorVap, was not sure about this as SN said they had gone bust?

---

14 May 2019 Catrin Hird

Next Action Changed From Catrin Hird To Gail Bell In the instance when Ryan says not to contact then please mark on the system.

Definitely do this for the Iran one and tag all products and click "Tag entire hospital / company..."

For Oxylink I would just tag the product and change status to do not contact - unless Ryan never wants us to chase them ?!?

If you just Google companies when someone says something like that you will be able to double check, all i did was put in Norvap and the first link was for companies house which states they are in administration - therefore tag this entire company and products as do not contact.

Thanks

---

21 May 2019 Gail Bell

## **Manufacturer QA data for oxygen sensors**

Issue ID #113903

Date Created 06/Feb/2018

Issued To: Derek Lamb

Completed Status: 27 Feb 2019

Linked Files

26 Feb 2019 Spreadsheet

### Notes:

Added by Steve Hardaker sent to Derek Lamb

Can you make the manufacturer sensor QA data visible on the "QA Report On All Items" link in invoiced sales?

At the moment it only shows QA data that we have entered ourselves when testing but JC advises that you have the OEM QA data behind the scenes.

The particular problem I'm trying to solve is to get the QA output data for Viamed sensors whilst on the phone to customers.

At the moment I have to get JC to search his emails from Envitec for the spreadsheet they send to him, I really need to have access to this myself if possible. Thanks.

---

06 Feb 2018 Derek Lamb

not an easy one to solve

we're not yet importing all the different sensor type qa records,  
just the ones we are pair matching,

i need to see how much we're getting, and how often its required to be looked up

---

06 Feb 2018 Steve Hardaker

its the pair matched ones I need.  
Just sent out some R-22Vi as warranty replacements for the first batch of the R-22Vi that failed after 9 months but the warranty replacements failed out of the box.

---

20 Feb 2019 Derek Lamb

You can access any stored QA data, from the Barcode history page,

---

22 Feb 2019 Steve Hardaker

I cant seem to make this work, I see no data for the Viamed oxygen sensors. Here's an example:

If Spectrum Medical ring up with a problem R-22Vi reading high, s/n V112536 / ID 1304970, how do I determine the original QA output?

I can search the serial number or ID and find the invoice, which leads me to a page 'QA Results for Items IN161156 0110021' but it shows no outputs, just a Pass Yes/No and the date.

As far as I know, the outputs are not in the system and involve hunting through spreadsheets, or is this data now being input, and if so, where do I find it?

---

26 Feb 2019 Derek Lamb

nope they probably not,

I only tend to upload the ones we need as and when,  
for example the matched pairs.

quickest way to find the spreadsheet is to goto the main google mail box, and search for serial number (without the V ).

---

27 Feb 2019 Steve Hardaker  
OK thanks.

Issued To: Catrin Hird

Completed Status: Still Outstanding

---

**Notes:**

Added by Steve Nixon sent to Catrin Hird

The office staff can be utilized in finding potential distributors and customers.

You should have all the relevant information from previous marketing.

The cross-reference database can be utilized and web sites of competitors and OEMs can be researched.

Main source will be Draeger (Air shields, Hill ROM).

Use the details of sensors from competitors to assist in the research.

Report to include analysis of the market, our marketing schedule and results obtained.

Promote to UK market.

Research potential new: Distributors

0110039 / 0110073 R-22VA

The office staff can be utilized in finding potential distributors and customers.

You should have all the relevant information from previous marketing. Remember the core reference sensors are the Atom Medical sensors.

The main application for these sensors is the Atom Medical neonatal incubators.

The main markets are Japan and SE Asia, but Atom is getting more established in the EU. We have started selling to Inspiration in the UK (Atom distributor)

Please attach a summary of previous marketing and the results. Sales of this sensor need to be increased.

Regarding the R-22VA Atom sensors, there are two numbers to cover the new sensor:

0110039 R-22VA single sensor Viamed branded

0110073 R-22VA matched pair Viamed branded

NOTE: These are designed for use in the latest Atom incubators, but they ALSO fit the older Atom incubators.

#### Compatibility:

Sensor - C81828-R22MATOM

Sensors - 60859 two piece sensor set

Incubator - Incu i

Incubator - Air Incu i

Incubator - Dual Incu i

Incubator - Model 100 Dual Incu i Combination incubator

Incubator - Model 100 Dual Incu i

Sensor - C44611-R22MATOM

Incubator - V-2100G (requires existing sensor cover)

Incubator - V-2200 (requires existing sensor cover)

The older Atom incubators can use the new sensor or the standard style R-22MED, so you can use:

0110022 R-22MED Teledyne

0110021 R-22MEDV Viamed branded

0110071 R-22MEDV Viamed branded matched pair

0110020 R-22MEDVi Viamed branded (better for incubator applications)

0110072 R-22MEDVi Viamed branded matched pair (better for incubator applications)

NOTE: These ONLY fit the older Atom incubators.

Compatibility:

Sensor - C44611-R22MATOM

Incubator - V-2100G (requires existing sensor cover)

Incubator - V-2200 (requires existing sensor cover)

As discussed, the sensor life is affected by the use in incubators and the clinical practice such as leaving incubators in standby mode. Sensor life is shortened (consumed quicker) by exposure to higher oxygen concentrations and higher temperatures. Humidity also has effects on sensors and can also affect sensor life.

Both the variants Vi and VA are better suited for use in incubators, especially when the incubators are left running in stand-by mode.

Issued To: Helen Lamb

Completed Status: 04 Jan 2019

---

**Notes:**

Copy Issue Main Issue #128224

Added by Steve Nixon sent to Catrin Hird

Please construct an active marketing plan for increasing the sales of:

0110045 R-45V

The office staff can be utilized in finding potential distributors and customers.

You should have all the relevant information from previous marketing. Remember the core reference sensors are used in the Nellcor Puritan Bennett (Mallinckrodt, Tyco, Covidien, Medtronics) ventilators.

The main application for these sensors is ICU ventilators.

Please attach a summary of previous marketing and the results. Sales of this sensor can be increased.

As discussed before we can also move customers from the 0110416 MAX-16 to the 0110045 R-45V.

See attached background information.

NPB have been using the Max-250TM (which we also have) but I believe that they may be going back to using the R-45V style sensor for some applications (approx 7,000 per year).

UK Lost customers between the above part numbers was completed in February this year.

Added to Distributor search again (this was completed in May 2018 with 10 potential distributors contacted)  
Office job #908. Also added as #909 to recontact customers previously contacted.

Looking into setting up Google Adwords again.

Issues 128244/128245

---

25 Sep 2018 Steve Nixon

Can you please construct a more formal plan with schedule.

What was the result of the last marketing exercise?

FYI I had discussed with Ali/Saadat about using the R-48V with their new vent, which is being manufactured in partnership with Heyer. Heyer have purchased sample orders previously. They were also evaluating R-17 and T-7V sensors, I think they were getting mixed up between T-7V and R-48V.

It sounds as though Heyer may be placing an order for 300 x R-48V. This is an example of quantities just from one customer. You can use Heyer as a case study.

---

16 Oct 2018 Steve Nixon

FYI City Tech may have production issues, so this is now more of a priority.

---

19 Oct 2018 Catrin Hird

It is going to be hard to show a schedule with accurate timings for these are is it dependant on the amount of time the office has to find distributors etc.

I am unsure of how to determine the effectiveness of the previous search. I will speak to Derek when I am next in to see if the system can show me the new unique customers from a set month.

Plan:

1. Potential Distributor Search - review completed distributor search and print.
2. Ask the office to find additional distributors who are selling the City Tech AA829-M10, or MediceL MOX-3 (other compatibles will also be researched - will add these to the related issue on the distributor search).
3. Search for customers who may use the Prima SP anaesthesia machines - ie mailing to Theatres. Also the Indray VT50 Ventilator which may be used in ICU and Critical Care.

---

20 Nov 2018 Catrin Hird

Added to marketing schedule which will be sent out in separate issue when complete.

VIAMED Stock Meeting - QA Processing

**OEM QA data 0110020**

Issue ID #144407

Date Created 07/May/2019

Issued To: Derek Lamb

Completed Status: 09 May 2019

---

**Notes:**

Added by Robert Connor sent to Derek Lamb

If possible, please can you add the QA data for the 0110020 R-22Vi sensors.

Serial numbers V1022141 to V1022240 on POR12056, and V1022241 to V1022340 on POR12062

---

08 May 2019 Derek Lamb

not got the data yet, when did they come in

---

08 May 2019 Robert Connor The earlier batch came in on 06/02/19, and the second one on 22/02/19.

---

09 May 2019 Derek Lamb

V1022241 to V1022340 on POR12062 Added

looking now for older email

---

09 May 2019 Derek Lamb

all done

---

09 May 2019 Robert Connor

ok, thank you

Copy Issue Main Issue #125576

Added by Catrin Hird sent to Catherine Spence

Please find below a list of sensors required for photography, the majority will be of the loose sensor, we do not want to open packaging, therefore, we will probably require these from depleted sensors. The full up-to-date (as far as I am aware) list is as follows:

0110014 R-15V  
0110021 R-22MEDV  
0110023 R-23V  
0110039 R-22VA  
0110040 R-30V  
0110041 R-41V  
0110042 R-42V  
0110043 R-43V (dual sensor pack)  
0110044 R-44V  
0110045 R-45V  
0110047 R-47V  
0110048 R-48V  
0110049 R-49V  
0110058 T-7V  
0110071 R-22MEDV (dual sensor pack)  
0110073 R-22VA (dual sensor pack)  
0110075 R-75V  
8010050 JFD - Divex

**Oxygen monitoring booklet corrections**

Issue ID #135393

Date Created 04/Jan/2019

Issued To: Catrin Hird

Completed Status: 10 Jan 2019

---

**Notes:**

Added by Steve Hardaker sent to Catrin Hird

Unfortunately, it looks like you missed the corrections listed on the related issue, the warranties are still incorrect on a number of sensors in the October '18 oxygen monitoring booklet and on the Cardiotec wall planner.

I noticed it specifically on the Viamed sensors, but it really needs a thorough check - exporting the catalogue stock group using the GHX template makes this fairly simple to do. Thanks.

Notes:

Added by Catrin Hird sent to Steve Nixon

Please can you clarify which of the following part numbers we will be able to sell as singles and which will have to be box quantities:

0120100

0120106

0120107

0120104

0120108

0120109

0120105 - discontinued?

0120103

0120110 - only sold as separate parts? Presume will have to be the box quantity though.

0120165

0120166

0120101

0120102

0120120

PP1968

0120125

0120126

0120127

0120128

0120129

0120130

0120131

0120133

0120139

0120140

0120141

0120142

If the supplier is able to produce the part number for a single and we order 50 x said part number could we then sell as singles?

Leaflet attached for reference.

**Oxygen sensors 0110016 & 0110021**

Issue ID #141396

Date Created 29/Mar/2019

Issued To: Zoey Teal

Completed Status: 11 Apr 2019

---

Notes:

Copy Issue Main Issue #141379

Added by Steve Nixon sent to Derek Lamb

As a consequence of the CE certification for our oxygen sensors being terminated, the Envitec manufactured sensors have been switched over to CE 00123.

This leaves two standard sensors to clarify:

0110016 R-17MEDV sensor is manufactured by Teledyne, but branded by Viamed. The sensible solution is to discontinue this and supersede it with 0110018 R-17V. This will come into effect on Monday. The mV outputs of both sensors are: 9 - 13 mV.

0110021 R-22MEDV was manufactured by Teledyne and branded Viamed. However, for the last few years this has been switched to being manufactured by Envitec. So, no further action is required.

As a consequence of the CE certification for our oxygen sensors being terminated, the Envitec manufactured sensors have been switched over to CE 00123.

This leaves two standard sensors to clarify:

0110016 R-17MEDV sensor is manufactured by Teledyne, but branded by Viamed. The sensible solution is to discontinue this and supersede it with 0110018 R-17V. This will come into effect on Monday. The mV outputs of both sensors are: 9 - 13 mV.

0110021 R-22MEDV was manufactured by Teledyne and branded Viamed. However, for the last few years this has been switched to being manufactured by Envitec. So, no further action is required.

Completed Status: 19 Jul 2019

Linked Files

16 Jul 2019 QA data for batch 2019-05 - sn V105851-V105950

---

**Notes:**

Added by Steve Hardaker sent to Derek Lamb

Good work pairing the R-43Vs but unfortunately, it was the wrong batch. All those have already been sold but it proves the matching is good.

Can you pair the outputs on the attached QA spreadsheet, which covers all the ones still in stock, and save it in my T drive as:

0110043 - Batch 2019-05 - V105851-V105950

---

17 Jul 2019 Derek Lamb

No access to T drive from here,

Search teh part number 0110043T

go into the old full details page,

in the stock locations there is a link for OEMQA data against the stock location

this should give you the results

---

17 Jul 2019 Steve Hardaker

QEMQA for location ID 34100 is the correct batch but we have a problem, 26 sensors (13 pairs) have already gone out, breaking the new pairings.

Can you copy just the 37 barcodes in stock location 33694 (0110043) to another virtual 0110043T location and pair just those?

---

18 Jul 2019 Derek Lamb

Next Action Changed From Derek Lamb To Catherine Spence sorry just picked this up,  
all we really need to do is use take stock of the ones that have gone out,  
its match items on the shelf.

they are 0110043T part number, so cathy cannot do any damage to stock count of 0110043 by clearing the used ones

cathy is this doable easily or do you need me to do it?

23 Apr 2019 Catrin Hird

Created Related Issue #143107

Added by Catrin Hird sent to Derek Lamb

Please can you change the Alternative Compatible colour to something else, as currently it is red and this confuses people with discontinued like the rest of intrastats.

---

23 Apr 2019 Catrin Hird

Next Action Changed From Catrin Hird To Steve Nixon Oxygen Sensors:

psr-11-915-1 - currently shows superseded or discontinued lines - I believe from the intrastats trail that it should be MAX-2 but the cross reference says alternative.

I think it is confusing using red as the alternative compatible colour as it is usually used for discontinued. Related issue sent to DL.

<https://www.cablesandsensors.eu/collections/o2>

07-00-0001 Hamilton Flow Sensor - although this is 2m and that shows in the cross reference, may add our part number and have as alternative instead of direct compatible.

GO-07SO - T-7

GO-430 could be mistaken for G0-430 which isn't in the cross ref

GO-160 could be mistaken for G0-160 which isn't in the cross ref, I have seen it stated as 0 on websites.

GO-15 (or GO-150) could be mistaken for G0-15 (or G0-150) which isn't in the cross ref

Same applies for the following:

GO-120 GO-12

GO-110 GO-11

GO-100 GO-10

Criticare 8500 Poet Gas Analyzers I believe uses an R-22MED, if that is the case then

[http://l.b5z.net/i/u/10114348/f/Brochure\\_Excel\\_O2\\_Sensor\\_Anes\\_414NP.pdf](http://l.b5z.net/i/u/10114348/f/Brochure_Excel_O2_Sensor_Anes_414NP.pdf) states it uses an PSR-11-917-MCC / CAT-644-PE which therefore should be compatible to R-22MED

(<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-criticare-cat-644-pe?variant=32680292489>)

10097559 is equivalent to 0110435 therefore it is also compatible to PSR-11-75-KE13PB  
(<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-covidien-puritan-bennett-10097559?variant=32680253577>)

PSR-11-75-KE250A compatible to MAX-250A (<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-maxtec-max-250a-r125p04-001?variant=32680245321>)

PSR-11-75-KE10 compatible to MAX-250+ (<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-maxtec-max-250-r125p02-011?variant=32680224009>)

PSR-11-75-KE2 currently states not known but <https://www.cablesandsensors.eu/products/compatible-o2-cell-for-covidien-puritan-bennett-g-062010?variant=32680204169> states compatible for G-062010 which we state is compatible with R-45V

<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-flight-medical-g-6025000-29?variant=32680179145> R-22Vi 0110020 G-6025000-29

Hudson RCI 5804 compatible to PSR-11-58-HC therefore compatible to MAX-49

See following link for numerous xref for R-17MED:

<https://www.cablesandsensors.eu/products/compatible-o2-cell-for-envitec-oom102-1?variant=32675169033>

---

30 Oct 2018 Steve Nixon

Next Action Changed From Steve Nixon To Catrin Hird Again, we need to move forward with this project

and get sales.

This may be of use, which I did for a couple of distributors:

Regarding the R-22VA Atom sensors, there are two numbers to cover the new sensor:

0110039 R-22VA single sensor Viamed branded  
0110073 R-22VA matched pair Viamed branded

NOTE: These are designed for use in the latest Atom incubators, but they ALSO fit the older Atom incubators.

Compatibility:

Sensor - C81828-R22MATOM  
Sensors - 60859 two piece sensor set  
Incubator - Incu i  
Incubator - Air Incu i  
Incubator - Dual Incu i  
Incubator - Model 100 Dual Incu i Combination incubator  
Incubator - Model 100 Dual Incu i

Sensor - C44611-R22MATOM  
Incubator - V-2100G (requires existing sensor cover)  
Incubator - V-2200 (requires existing sensor cover)

The older Atom incubators use the standard style R-22MED, so you can use:

0110022 R-22MED Teledyne  
0110021 R-22MEDV Viamed branded  
0110071 R-22MEDV Viamed branded matched pair  
0110020 R-22MEDVi Viamed branded (better for incubator applications)  
0110072 R-22MEDVi Viamed branded matched pair (better for incubator applications)

NOTE: These ONLY fit the older Atom incubators.

Compatibility:

Sensor - C44611-R22MATOM  
Incubator - V-2100G (requires existing sensor cover)  
Incubator - V-2200 (requires existing sensor cover)

As discussed, the sensor life is affected by the use in incubators and the clinical practice such as leaving incubators in standby mode. Sensor life is shortened (consumed quicker) by exposure to higher oxygen concentrations and higher temperatures. Humidity also has effects on sensors and can also affect sensor life.

Both the variants Vi and VA are better suited for use in incubators, especially when the incubators are left running in stand-by mode

---

31 Oct 2018 Catrin Hird

Next Action Changed From Catrin Hird To Steve Nixon The above issue is for numbers to be added to the cross reference i.e. 62060.

I will add your above notes to the marketing plan issue you have sent on #128220

---

21 Dec 2018 Steve Nixon

Next Action Changed From Steve Nixon To Catrin Hird OK thanks. We need to double check the information. Can we assume that say 610602, 61603 shouldn't be in the cross ref. as there is no O2 controller? Or is there an O2 monitor?

---

03 Jan 2019 Catrin Hird

Next Action Changed From Catrin Hird To Steve Nixon I have tried to review 61602 61603 61607 61608 but can not seem to find further information.

As mentioned above you may be correct that they are not required in the cross reference, if the O2 controller is not included. If a monitor could be used I am unsure whether you would be able to determine which type of monitor they would use.

---

23 Apr 2019 Steve Nixon

OK, suggest close the issue. Xref seems to be current.

Date Created 30/Jul/2018

Issued To: Derek Lamb

Completed Status: 06 Aug 2018

---

**Notes:**

Added by Catrin Hird sent to Derek Lamb

Please can you add a toggle to allow for the distributors list to toggle between I and O account as some O accounts are couriers.

Thanks

---

30 Jul 2018 Derek Lamb

didnt like the idea of toggle, as I cannot see anypoint anyone would use it, least not in the office, where they wouldnt now to look for justtec (for example)

so, instead if the Iaccount name is different to the O account name it puts the I account in brackets... think htis will do for now?

---

30 Jul 2018 Catrin Hird

I'm on 0110023 Oxygen sensor R-23V Distributors and its not showing for 6027

---

30 Jul 2018 Derek Lamb

**QA and returns stats trigger for batch problems**

Issue ID #148247

Date Created 26/Jun/2019

Issued To: Derek Lamb

Completed Status: 03 Jul 2019

---

**Notes:**

Added by Steve Nixon sent to Derek Lamb

We have a running stats failure figure based on totals sensors sales.

To indicate a peak in returns or batch problems we either need for personnel to let us know or for IntraStats to raise an alarm, say failure rate from the last 100 to 200 sensors...

We appear to have problems with 0110043 & 0110023

---

01 Jul 2019 Derek Lamb

as discussed, updated the pages and links a bit,  
there is no active tracking for batches yet.

there is however, a QA fails report issue that fires once a month,

VIAMED Stock Meeting - Purchase Order Requirements

**R-22AV stock and orders update 5/3/19**

Issue ID #139675

Date Created 05/Mar/2019

Issued To: Steve Nixon

Completed Status: 07 Mar 2019

---

**Notes:**

Added by Steve Hardaker sent to Steve Nixon

The incoming purchase order that we discussed yesterday for Inspiration Healthcare is looking like it will be as follows:

150 x 0110021 - R-22MEDV

50 x 0110047 - R-47V

We look OK for R-47V. Regarding R-22MEDV, we have the following:

90 in stock

300 incoming this/next week

200 to go straight back out to Inspiration Healthcare

150 to go out when PO received this week

Balance: 40 sensors

200 to arrive 3/4/19 (this will build back up the IHC and Spectrum reserve stock)

100 ordered yesterday, delivery date unconfirmed

Looks like we need yet more in the pipeline if we don't want to have to eat into the reserve stock.

---

06 Mar 2019 Steve Nixon

Ordered as discussed.

100 x R-22MEDV

50 x R-47V

VIAMED Stock Meeting - Purchase Order Requirements

**R-22MED stock holding, suggested revision**

Issue ID #128216

Date Created 18/Sep/2018

Issued To: Steve Nixon

Completed Status: 18 Sep 2018

---

Notes:

Added by Steve Hardaker sent to Steve Nixon

Please can you take a look at 0110021 - R-22MEDV, I think we need to increase our stock-holding slightly.

Currently, we're floating around 200 in stock and 100 on supplier order, making a pipeline of around 200-300 sensors.

Annual usage is increasing, the system estimates approx 1945/year or 162/month, so we are realistically covering 2 months stock including what's in the supplier pipeline. The lead-time on the last order was 1 month.

Inspiration Healthcare orders 100 at a time with Spectrum Medical doing similar sized orders and suggesting that they will be increasing usage over the next year and will need to put in unexpected top-up orders from time to time.

In addition, an export customer (Asil) occasionally orders 140 in a single order, so we could get wiped out by badly timed orders.

Can we increase the pipeline stock slightly, maybe to around 300-400, ie 300 stock and 100 on supplier order at any one time? This reflects 2-3 months stock and will give us a softer buffer without sensors getting too old in stock.

---

18 Sep 2018 Steve Nixon

Thanks, will do

Issues:128216

VIAMED Sales And Marketing - Post Market Surveillance

**R-22Vi matched pairs operational lifespan (644)**

Issue ID #113036

Date Created 25/Jan/2018

Issued To: Steve Hardaker

Completed Status: 24 Apr 2019

---

Notes:

System Generated

Follow up customers using the R-22Vi matched pairs (0110072) in Isolette incubators to see if they have lasted 12 months. See issue 55275.

---

01 Feb 2018 Steve Hardaker

Billy Hogg at Borders General reported the failure of their first pair, bought 11/4/17, lasted 9 months in service. Started a spreadsheet to log lifespan.

---

02 Feb 2018 Steve Hardaker

Reviewed SRS system. 3 pairs have been returned so far including Borders General.

One pair has an intermittent connector on 1 sensor - SRS66204.

A pair from Airedale became mismatched, the sensors drifted apart after 8 months 16 days from sale.

---

06 Feb 2018 Steve Hardaker

Warranty replacement pair failed out of box, SN V100853 & V100854. These were originally a matched pair at 12.9 mV but V100854 has dropped to 10.8 mV and they wont calibrate. - SRS66404 Borders General.

---

19 Feb 2018 Steve Hardaker

West Cumberland Hospital reported failure to cal for s/n V100018 & V100006, 10 months 1 day from sale. Current tally: 4 pairs failed in service within 10 months (excluding 1 failed connector).

---

16 Apr 2018 Steve Hardaker

Andrew Barlow at Airedale reported a pair that failed in just 20 days. Initially calibrated but now failing. See SRS66506 - SN V100970 & 71.

17 Apr 2018 0110043 R-43V Sensor Label SAMPLE4 2018-04-17

29 Aug 2018 R-43V sample test results.

---

Notes:

Added by Steve Hardaker sent to Catrin Hird

We have some R-43V with a platinum cathode that we want to send to customers to test, however, as these are untried, we need to label them as Not For Clinical Use.

Can we discuss with SN next week as we may need to redesign the label or make a small over-label, but space is very limited.

---

16 Apr 2018 Catrin Hird

Oxygen Sensor labels are designed by Envitec but we have done this before for R-22Vi and JC/Derek can print the labels.

Would need the Serial Number if we have it otherwise we can use the attached artwork to print with SN as Sample.

I believe this is the old layout though. SN may have the original file from Envitec that I can doctor and print in-house.

---

17 Apr 2018 Steve Hardaker Serial numbers are: Sample1, Sample2, Sample3, Sample4.

---

17 Apr 2018 Catrin Hird

Next Action Changed From Catrin Hird To Derek Lamb Derek, please can you print the attached labels for SJH to show to SN.

**Sensor Recycle Data**

Issue ID #124780

Date Created 26/Jul/2018

Issued To: Catrin Hird

Completed Status: 27 Jul 2018

---

Notes:

Copy Issue Main Issue #124779

Added by Derek Lamb sent to Steve Nixon  
in the returns menu, down the bottom  
trade in / non repairs returns,

you should have Sensor Recycle Data.

take a look, it contains a customer list, with a contacted button so its technically possible to go down the list  
sending letters, after the sensor has been processed in the building.

we can also pull out some basic stats on type of sensors being returned,

think its worth seeing if this data is valuable or not.

looks like it does take some time to process the sensors into the building,  
unpacking, determining the sensor make and model,  
deciphering the writing on the labels, seems out input boxes might be too small making the writing hard to  
read.

also as it goes via the CRM (the address problem) causing the input to be slowed down.

but in short its easy to separate processing the sensor and sending a letter.

---

27 Jul 2018 Catrin Hird

Presume this is from a Steve query but these are my thoughts.

The processing of the return could be a job for someone in the warehouse and then if this list is generated it  
could be a weekly list for the office to produce the letters?

We can update the stickers if required but it is a down to the customers handwriting.

Another option could have a web form that the customer fills in, but you may struggle for them to do this  
rather than just put in a bag and send back to us.

Doesn't actually look like anyone has been doing the disposal service since February. Happy for it to be  
one of my jobs if they don't have the time.

We could use this information to target customers who have send back original manufacturer ones who  
haven't converted onto the Viamed version. Would possibly require some extra features in the letter page to  
do this but I'm sure its doable. i.e. sent back Draeger 6850645 which is equivalent to 0110023, did they then  
start to purchase after this date? If not send a letter specifically about the R-23V.

**Update regarding Viamed branded oxygen sensors - 2019-03-29**

Issue ID #141378

Date Created 29/Mar/2019

Issued To: Zoey Teal

Completed Status: 11 Apr 2019

---

Notes:

Copy Issue Main Issue #141361

Added by Steve Nixon sent to Derek Lamb

Last week we were advised that the Viamed CE certification for our oxygen sensors manufactured by Envitec is no longer valid.

In response to this the sensors will now be labelled and covered by certification issued by CE 0123 (TÜV SÜD) instead of CE 0086 (British Standards Institute). The sensor deliveries will not be affected.

In addition, the sensors will be labelled with the 'factory' symbol followed by the text: Envitec-Wismar GmbH, this is to clearly show that the sensors are manufactured by Envitec. The sensors will still be Viamed branded and labelled with our contact details. The sensors will state of part numbers (REF) and model numbers.

The sensors covered are as follows and the new labelling will start to be applied by the factory as of today.

0110014 Oxygen sensor R-15V

0110018 Oxygen sensor R-17V

0110019 Oxygen sensor R-17Vi

0110020 Oxygen sensor R-22Vi

0110021 Oxygen sensor R-22MEDV

0110023 Oxygen sensor R-23V

0110025 Oxygen sensor R-23Vi

0110039 Oxygen sensor R-22VA

0110040 Oxygen sensor R-30V

0110041 Oxygen sensor R-41V

0110042 Oxygen sensor R-42V

0110043 Oxygen sensor R-43V. Pack of 2 sensors.

0110044 Oxygen sensor R-44V

0110045 Oxygen sensor R-45V

0110047 Oxygen sensor R-47V

0110048 Oxygen sensor R-48V

0110049 Oxygen sensor R-49V

0110058 Oxygen sensor T-7V

0110071 Oxygen sensor R-22MEDV. Pack of 2

0110072 Oxygen sensor R-22Vi. Pack of 2

0110073 Oxygen sensor R-22VA. Pack of 2

0110075 Oxygen sensor R-75V

Contracts and associated paperwork with Envitec are being edited and processed.

The Envitec CE certificate will now cover the sensors that will be delivered from today. The certificate will be linked to the stock pages next week.

The CE Declaration of Conformity will be replaced next week and again will be linked to the stock.

The datasheets are still valid, but will be updated and also revised in due course.

Next week I will prepare a document illustrating the new labelling. Eventually the labelling artwork will be incorporated as part of each sensor datasheet.

Sensor images on literature and the web site have been/will be edited or updated by Catrin.

New sensor images will be taken in due course.

---

29 Mar 2019 Steve Hardaker

I suggest we make a note of the serial numbers for each sensor type to identify when the labelling change occurred, we may need it for future reference.

Or we could link the body number to the serial number in Intrastats so we can identify the labelling that was on the sensor from a simple serial number lookup.

---

11 Apr 2019 Steve Nixon

As discussed it applies to all sensors received from 01/04/2019 onwards. I'll look to add it to the stock screens.

0110045 Oxygen sensor R-45V

0110047 Oxygen sensor R-47V

0110048 Oxygen sensor R-48V

0110049 Oxygen sensor R-49V

0110058 Oxygen sensor T-7V

0110071 Oxygen sensor R-22MEDV. Pack of 2

0110072 Oxygen sensor R-22Vi. Pack of 2

0110073 Oxygen sensor R-22VA. Pack of 2

0110075 Oxygen sensor R-75V

Contracts and associated paperwork with Envitec are being edited and processed.

The Envitec CE certificate will now cover the sensors that will be delivered from today. The certificate will be linked to the stock pages next week.

The CE Declaration of Conformity will be replaced next week and again will be linked to the stock.

The datasheets are still valid, but will be updated and also revised in due course.

Next week I will prepare a document illustrating the new labelling. Eventually the labelling artwork will be incorporated as part of each sensor datasheet.

Sensor images on literature and the web site have been/will be edited or updated by Catrin.

New sensor images will be taken in due course.

Notes:

Copy Issue Main Issue #141361

Added by Steve Nixon sent to Derek Lamb

Last week we were advised that the Viamed CE certification for our oxygen sensors manufactured by Envitec is no longer valid.

In response to this the sensors will now be labelled and covered by certification issued by CE 0123 (TÜV SÜD) instead of CE 0086 (British Standards Institute). The sensor deliveries will not be affected.

In addition, the sensors will be labelled with the 'factory' symbol followed by the text: Envitec-Wismar GmbH, this is to clearly show that the sensors are manufactured by Envitec. The sensors will still be Viamed branded and labelled with our contact details. The sensors will state of part numbers (REF) and model numbers.

The sensors covered are as follows and the new labelling will start to be applied by the factory as of today.

0110014 Oxygen sensor R-15V  
0110018 Oxygen sensor R-17V  
0110019 Oxygen sensor R-17Vi  
0110020 Oxygen sensor R-22Vi  
0110021 Oxygen sensor R-22MEDV  
0110023 Oxygen sensor R-23V  
0110025 Oxygen sensor R-23Vi  
0110039 Oxygen sensor R-22VA  
0110040 Oxygen sensor R-30V  
0110041 Oxygen sensor R-41V  
0110042 Oxygen sensor R-42V  
0110043 Oxygen sensor R-43V. Pack of 2 sensors.  
0110044 Oxygen sensor R-44V  
0110045 Oxygen sensor R-45V  
0110047 Oxygen sensor R-47V  
0110048 Oxygen sensor R-48V  
0110049 Oxygen sensor R-49V  
0110058 Oxygen sensor T-7V  
0110071 Oxygen sensor R-22MEDV. Pack of 2  
0110072 Oxygen sensor R-22Vi. Pack of 2  
0110073 Oxygen sensor R-22VA. Pack of 2  
0110075 Oxygen sensor R-75V

The Envitec CE certificate will now cover the sensors that will be delivered from today. The certificate will be linked to the stock pages next week.

The CE Declaration of Conformity will be replaced next week and again will be linked to the stock.

The datasheets are still valid, but will be updated and also revised in due course.

Next week I will prepare a document illustrating the new labelling. Eventually the labelling artwork will be incorporated as part of each sensor datasheet.

Sensor images on literature and the web site have been/will be edited or updated by Catrin.

New sensor images will be taken in due course.

VIAMED Stock Meeting - Any Other Business

**Update regarding Viamed branded oxygen sensors - 2019-03-29**

Issue ID #141364

Date Created 29/Mar/2019

Issued To: Emily Hanson

Completed Status: 11 Apr 2019

---

Notes:

Copy Issue Main Issue #141361

Added by Steve Nixon sent to Derek Lamb

Last week we were advised that the Viamed CE certification for our oxygen sensors manufactured by Envitec is no longer valid.

In response to this the sensors will now be labelled and covered by certification issued by CE 0123 (TÜV SÜD) instead of CE 0086 (British Standards Institute). The sensor deliveries will not be affected.

In addition, the sensors will be labelled with the 'factory' symbol followed by the text: Envitec-Wismar GmbH, this is to clearly show that the sensors are manufactured by Envitec. The sensors will still be Viamed branded and labelled with our contact details. The sensors will state of part numbers (REF) and model numbers.

The sensors covered are as follows and the new labelling will start to be applied by the factory as of today.

0110014 Oxygen sensor R-15V

0110018 Oxygen sensor R-17V

0110019 Oxygen sensor R-17Vi

0110020 Oxygen sensor R-22Vi

0110021 Oxygen sensor R-22MEDV

0110023 Oxygen sensor R-23V

0110025 Oxygen sensor R-23Vi

0110039 Oxygen sensor R-22VA

0110040 Oxygen sensor R-30V

0110041 Oxygen sensor R-41V

0110042 Oxygen sensor R-42V

0110043 Oxygen sensor R-43V. Pack of 2 sensors.

0110044 Oxygen sensor R-44V

0110045 Oxygen sensor R-45V

0110047 Oxygen sensor R-47V

0110048 Oxygen sensor R-48V

0110049 Oxygen sensor R-49V

0110058 Oxygen sensor T-7V

0110071 Oxygen sensor R-22MEDV. Pack of 2

0110072 Oxygen sensor R-22Vi. Pack of 2

0110073 Oxygen sensor R-22VA. Pack of 2

0110075 Oxygen sensor R-75V

Contracts and associated paperwork with Envitec are being edited and processed.

The Envitec CE certificate will now cover the sensors that will be delivered from today. The certificate will be linked to the stock pages next week.

The CE Declaration of Conformity will be replaced next week and again will be linked to the stock.

The datasheets are still valid, but will be updated and also revised in due course.

Next week I will prepare a document illustrating the new labelling. Eventually the labelling artwork will be incorporated as part of each sensor datasheet.

Hi

I am looking to replace a PSR-11-917 MH oxygen sensor from Analytical Industries. I purchase some of your sensors from a Company here in Ireland called Oxygen Care. I have found the following sensor on your webpage, that looks like a replacement.

Part number

0110021

Product name :

R-22MEDV Oxygen Sensor

GTIN / EAN13

5051826008461

Could you please quote me for this sensor?

Regards,

Gary
