Stock Reference	Description
0013110	Carrying case.
1410000	Foetal Heart Simulator model V1000.
1420000	Wall mount for Foetal Heart Simulator
1420001	Case protector for Foetal Heart
1430270	PCB - Foetal Heart Simulator.
1430284	V1000 Case with keypad cut outs.
1430285	V1000 Case.
1430286	V1000 Case Seal Kit.
1430287	V1000 Battery Compartment 4 x AA
1430288	V1000 Battery Clip 4 x AA
1430295	V1000 Keypad Membrane
1430296	V1000 label set (2) - case rear panel.
1430297	V1000 intensity control potentiometer.
1430300	V1000 PCB Assembly.
1430301	V1000 Transducer Mount.
1430302	V1000 Transducer.
1430303	V1000 Transducer mounting screw.
1430304	V1000 Transducer mounting washer.
1430305	V1000 Transducer mounting nut/spacer.
1430306	V1000 Transducer screw.
1430307	V1000 Transducer washer.
1430308	V1000 Transducer nut.
1430309	V1000 Transducer interface cushion.
1430319	V1000 Transducer interface cushion (v2).
1430320	V1000 Transducer v2.
1440000	Labour charge - Repair of V1000 Foetal
1450000	Packing box - V1000
1480000	Foetal Heart Simulator V1000 - Service
1480001	Foetal Heart Simulator V1000 -
1490000	Leaflet - V1000 Foetal heart simulator.
1490001	Instructions for Use - V1000 Foetal
1490002	V1000 Product Application Sheet

1420001	Unchecked - Returned To Stock							

Comments on Returns:

mainly returns are services and calibration checks.
a limited number of keypad issues.

Comments on Risks with Returns and Potential Re-work:

no risks with returns
keypad issue limited and results in device failure, but no risk to machine being tested

Repair codes V1000

Issue ID #127518

Date Created 06/Sep/2018

Issued To: Derek Lamb

Completed Status: 22 Nov 2018

Notes:

Added by Steve Nixon sent to Derek Lamb

On Repair Codes, where does the third column come from.

With 1440000 FOETAL is spelled as FEOTAL. Suggest changing this to just V1000

Can I edit & add to the codes?

Need to add:

1480001 Foetal Heart Simulator V1000 - Calibration Certificate

V1000

Calibration

06 Sep 2018 Derek Lamb

you need to check the opera description as that looks like it was the source of the original barcode label description,

that's still in the stock extra -old page, guess it should be moved to the new stock extra page
fixed the intrastats record,

1480001 description will come from the opera description first,

Intrastats - Intrastats

Serviceable Items: Clear

Issue ID #124534

Date Created 23/Jul/2018

Issued To: Derek Lamb

Completed Status: 24 Jul 2018

Notes:

Added by Catrin Hird sent to Derek Lamb

Please can you clear the list of Serviceable items. I have contacted all UK unique customers for:

0310002

0310097

0310030

0310031

0310032

0310034

1410000

From tomorrow we are then able to contact the customers which come up on the list.

Will these be by date or will they get notice of the service period running out?

24 Jul 2018 Derek Lamb

cleared the list,

currently its looking just at new sales a year ago, and or srs returns a year ago,

I can change it to 11 months i guess for early warning of a service due

24 Jul 2018 Catrin Hird

Perfect thanks

Servicing Letters - V1000 and Tom Thumb

Issue ID #125306

Date Created 02/Aug/2018

Issued To: Steve Nixon

Completed Status: 06 Aug 2018

Notes:

Copy Issue Main Issue #125304

Added by Sarah Walton sent to Catrin Hird

We have had customers phoning up with regards to the V1000 servicing letter sent out recently. They have queried the price. The part number on the letter is for the certificate only (1480001), not the service and certificate (1480000) which is £45.00 plus £10.00 carriage.

See attached.

Derek, are we going to have to honour this until the next mailing goes out? If so, can you authorise to proceed at £35.00 plus £10.00 or advise otherwise.

Date Created 02/Aug/2018

Issued To: Derek Lamb

Completed Status: 06 Aug 2018

Notes:

Copy Issue Main Issue #125304

Added by Sarah Walton sent to Catrin Hird

We have had customers phoning up with regards to the V1000 servicing letter sent out recently. They have queried the price. The part number on the letter is for the certificate only (1480001), not the service and certificate (1480000) which is £45.00 plus £10.00 carriage.

See attached.

Derek, are we going to have to honour this until the next mailing goes out? If so, can you authorise to proceed at £35.00 plus £10.00 or advise otherwise.

03 Aug 2018 Catrin Hird

Urgent Flag Changed To On The letter is regarding the certificate of calibration not a service. Therefore it is the right part number and price.

The service is different, the letter is regarding the testing the V1000 and providing calibration certificate. A service is more indepth.

You need to speak with SN on his return for clarification, or speak with Phil for him to confirm what the difference is between the 2 if you are unsure.

03 Aug 2018 Catrin Hird

Urgent Flag Changed To Off I've emailed Steve for clarification

06 Aug 2018 Sarah Walton

Next Action Changed From Catrin Hird To Steve NixonI spoke to Steve several weeks ago and we had a conversation about both these part numbers. He agreed that we should get rid of the calibration certificate part number and just use the service and certificate one, so I am a little confused!

I will speak to him when he gets back in the office.

VIAMED Feedback - Product Feedback Negative

V1000 failures - needs a response

Issue ID #100588

Date Created 11/Aug/2017

Issued To: Steve Nixon

Completed Status: 24 Apr 2019

Notes:

Added by Steve Hardaker sent to Steve Nixon

Huntleigh are reporting more failures of the V1000 due to the membrane keypad, John Hughes stated in an email:

"I've got 3 units in need of repair, they've got the same fault where they won't switch on.

We've had this problem before and it's getting a bit tedious having to send the units back to get the membrane changed.

Is there anything that you can do to improve the membrane so it lasts?"

I have given him a returns number (SRS66150), they were sold March 5 but I assume we will do these under warranty as its a recurring issue with the membrane?

Please can you contact John Hughes to advise what steps we plan to take to rectify this moving forward?

11 Aug 2017 Steve Nixon

As discussed previously, I have asked the keypad membrane manufacturer to investigate this. I'm awaiting their report.

23 Sep 2017 Derek Lamb

Added for reference 1410000

29 Oct 2017 Steve Nixon

Urgent Flag Changed To Off As discussed the fault has been traced to keypad design issue. The keypad design has now been updated and will be used for future orders. In the meantime MG, PC & JC know how to rectify existing units using a bead of silicone to protect the exposed area of flex circuit. MG should be creating a procedure.

01 Nov 2017 Steve Hardaker Are we going to consider this as a design flaw and replace the keypad FOC for any units that are returned with this failure regardless of warranty status, or will we insist on it being chargeable?

22 Aug 2018 Derek Lamb

future orders have a modified track layout,
existing builds are rectified by a bead of silicone

Notes:

Added by Steve Nixon sent to Philip Crossley

See attached images, is this a fault that we have seen before, with the track burnt out? If so, how many times? Do we have samples of damaged keypads? I will discuss with the keypad manufacturer; either design issue with our circuit or design/fault issue with the keypad membrane. We need to resolve this one.

In the returns reporting there are three keypad faults listed, are they effectively the same. If so, perhaps we should clean the codes to `Replaced faulty keypad membrane`.

Serviced with new Keypad; 10 faults

Replaced Keypad; 2 faults

membrane keys not working; 7 faults

Out of 406 units sold, 19 keypad faults (4.68%)

13 Jun 2017 Steve Nixon
email from customer:

Dear Zoey Teal,

Thank you for your kindly reply.

In our factory, we have three units of this model, but it is easy to broken.

Please check the attachment. is there any technological improvement now?

And how much for this model now?

Looking forward to your kindly reply.

Best regards

Mabel Wong
Sales Manager

Foshan Shunde Changxing Ultrasonic Instrument.Co.,Ltd.

13 Jun 2017 Steve Nixon
Hi Zoe

Apart from using a different transducer, the basic design hasn't changed.

Can they let us know the serial numbers of the units. We need to investigate how the keypad has been damaged.

The units look very dirty and there is evidence of a lot of fluid spillage.

Looks like they have modified the unit instead of replacing the keypad.

Do they want us to check and service their units?

Steve

14 Jun 2017 Steve Nixon
Tomorrow we will send 10 examples to the manufacturer for investigation, see email below:

Hi Steve,

Thanks for the information.

The returns number controlling this issue is RMA DUK002820, once we receive the product we will produce an 8D report with preventative measures, corrective actions and a root cause.

The returns address is:

SCHURTER Electronics Ltd.
29 Pembroke Road,
Aylesbury,
Bucks.
HP20 1DB.

www.schurter.com

21 Aug 2017 Steve Nixon
Followed up with the manufacturer, see attached report from Schurter:

21 Aug 2017 Steve Nixon
email from Schurter:

Hi Steve,

Good to talk to you earlier,

As discussed I have attached a copy of the Test certificate for the test I have run against a stock part which we have. This ran powered for one million actuations to which no damage nor failure was found, I have since restarted the test for a further one million actuations at a higher power to which I also expect to find no failure.

There seems to be some moisture potentially being trapped within the part as the small area of exposed

silver along the base of the tail has signs of corrosion on the powered track which eventually causes the parts to fail. A couple of proposed solves to this would be to cover the small area of exposed silver by either bringing the dielectric down the tail to cover where the silver is exposed or to bring the adhesive further up the part to protect the open area of silver.

I shall in the mean time investigate to why this area is exposed and also put into place a solve to this issue after speaking with some of my colleagues.

I shall keep you informed as to any decisions and potential changes we could make.

Regards,

Darren Rhodes
Quality Supervisor

21 Aug 2017 Steve Nixon

I have asked Schurter to look into redesign.

They said that they did not design the layout, but they Danielson/Schurter will have designed the mechanical construction plates, so they should take responsibility for the small gap that is leaving the tracks exposed to moisture.

In the meantime will discuss with PC, MG, JC. We can apply a small bead of silicone to the exposed areas of the tracks. The problem looks to be that moisture is attacking the exposed track, I believe that this is exacerbated by there being no adhesive along the lower edge of the membrane. This is probably where moisture (ultrasound gel/cleaning fluid) is getting in.

The keypad design has passed functional tests and the tracks are adequate for the power consumption.

21 Aug 2017 Steve Nixon

See attached images:
Keypad 1, 2 & 3

Keypad 1: Burnt out track (track 3 from LHS) can be clearly seen where junction of the green coloured flex tail meets the main assembly. This is a common fault location.

Keypad 2: Shows that there is no adhesive on the lower edge cut out section, therefore tracks underneath are not effectively sealed against moisture.

Keypad 3: Shows the small gap (approx. 1mm) along the edge of the green flex tail, where the track is not protected against potential damaged from flexing and/or moisture corrosion.

22 Aug 2017 Philip Crossley

I happen to have 3 relatively new V1000s in from Huntleigh Healthcare all needing keypads. PR01883A16, A13 and A17 on SRN28750, 51 and 52.

I will try the silicone bead on all 3 and put a black X in the bottom corner for easy identification later.

08 Sep 2017 Steve Nixon

Next Action Changed From Philip Crossley To Derek Lamb On Tuesday also reviewed with MG and JC in lieu of PC absence.

MG will silicone production units and repairs. He will also produce procedures for both.

Still waiting to hear back from Schurter.

20 Sep 2017 Steve Nixon

Tried to follow up with Darren Rhodes at Schurter, left voicemail.
