Status – Medical variants – **CURRENT**

Veterinary variant – **Not generated yet, but to be reviewed at SN next meeting**

Viamed VM-2160 SMARTsat Series Pulse Oximeters

Status review January 2019

0012165 VM-2160 SMARTsat – Central European language pack - Released
0012166 VM-2160 SMARTsat – Northern European language pack - Released
0012167 VM-2160 SMARTsat – Special characters language pack - Released
0012168 VM-2160 SMARTsat – Asia I language pack – No plans to release
0012169 VM-2160 SMARTsat – Asia II language pack – No plans to release
0012170 VM-2160 SMARTsat – Veterinary version – Not yet released

We are just selling disposables with plaster tape, not releasing with Transpore or foam.

Sensor production moved from Envisen to Carlisle. This will maintain supplies and standards.

We already have the VM-2160 Series accessories: clamps, cases...

NOTE: For the veterinary version we will need to generate and test the Veterinary version sensors (lingual clip and multi-site Y).

	Stock	Total sales	Sales 2018
0012165	12+45	18	17
0012166	9+20	6	6
0012167	4+10	12	12
	Total sales	36	

We do need to produce clinical studies for marketing purposes.
