Notification of Change of CE Notified Body Number. Viamed Branded Medical Oxygen Sensors

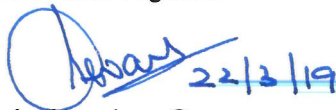

Dear Mr. Nixon,

We have been notified that Viamed is currently undergoing changes to the scope of the certifications for the Viamed branded medical oxygen sensors. As part of this, sensors are transitioning from the CE notified body number **CE 0086** to **CE 0123**.

Compliance with applicable standards is maintained and unaffected.

With immediate effect all Viamed branded medical oxygen sensors manufactured by Envitec will have Envitec's CE mark and notified body number applied. The sensors will be branded as Viamed, but the manufacturer of the sensors will be stated as Envitec. These sensors will be covered by Envitec's: EC Declaration of Conformity, EC and EN ISO 13485:2016 certifications.

With kind regards

i.A. Sheehan Soans
