Statement on material compatibility of Actichlor Plus

Actichlor Plus is a surface disinfectant for all kind of surfaces in the medical field.

These sodium dichlorisocyanurate tablets that dissolved in water produce a solution of active chlorine.

As legal manufacturer of Actichlor Plus we confirm the following material compatibility:

Metals	Stainless steel (316), Aluminium, Hasteloy C®, Titanium,
Non-metals	Carbon graphite, Ceramic AL203, Ceramic magnet
Plastics	ABS, CPVC, Hytrel®, HDPE, LDPE, Noryl®, PC, PP, PPS, PTFE, PVC, PVDF
Elastomers	Nitrile (Buna N), EPDM, Hypalon®, Kel-F®, Satoprene®, Tygon®, Viton

Additionally Actichlor Plus solutions up to 5000ppm can be used to disinfect mattress covers made of thermoplastic polyurethane, PVC/ polyester and on vinyl upholstered fabrics.
