Dear «TITLE» «SURNAME»,

**VersaStream Gas Sampling Lines for use with Capnographs and Multigas Monitors
with Luer Lock Male or Respironics/Philips compatible connector**

VersaStream gas sampling lines are an innovative solution for sidestream gas monitoring, offering a one-piece sampling line solution with increased performance and low cost.

VersaStream gas sampling lines use the latest material technologies to allow the **removal of moisture and water** - even in cases of low temperatures and high humidity. The **integrated bacterial filter** prevents contamination and they are very **flexible** - suitable for both short-term and long-term applications.

Why VersaStream gas sampling lines?

- **Cost-effective** - alternative to Nafion® tubes
- The gas-selective non-porous material facilitates fast **removal of condensation** from the sampling line
- The **integrated bacterial filter** prevents contamination
- Can **reduce the costs** of regular water trap exchange (if present)
- **Reliable measured gas values**, due to negligible dead space volume of the filter - even in cases of high respiration rates
- Integrated bacteria filter and water removal **reduces the number of patient circuit parts and speeds up patient monitoring preparation time**
- VersaStream Types available:
 - **Luer Lock Male gas sampling line for use with many common types of gas exchange monitors, either low-flow or high flow**
 - **Respironics/Philips CO₂ sampling line for use with LoFlo™ sidestream modules**

Both ranges are available in a number of variants including: single nasal sampling line, nasal cannula, nasal/oral cannula and a one-piece airway adapter sampling line.

They are compatible with a wide range of OEM equipment, please see our cross reference and selection guides for further information: www.viamed.co.uk/linesxref.

Should you be unable to find the equipment you are using please contact us so that we can search our extensive database.

Please find enclosed a leaflet outlining the range along with a price list.

Should you have any further questions regarding this, or would like to obtain samples for evaluation, please do not hesitate in contacting our sales team on 01535 634542 or email samples@viamed.co.uk

Yours sincerely

Catrin

The VersaStream range includes compatibles for the following:

Oridion

Nellcor, Covidien,
Medtronics

Compatible to the Filterline range
of sampling lines and for use with
Microstream enabled capnographs

Respironics

Philips, Dräger

For use with
LoFlo™ sidestream modules

Luer Lock Male

For use with Capnographs
and Multigas Monitors that
incorporate a Luer Lock
sampling port

**Viamed
Masimo, Phase-In**

For use with VM-2500 Sidestream
Capnographs and
Masimo/Phase-In technology
enabled capnographs
