July 2019

Dear Sir or Madam,

Notice of Product Discontinuation – LIMITED STOCK AVAILABLE

Teledyne Analytical Instruments AX300 Oxygen Analyser and MX300 Oxygen Monitor

It is with regret that as of the 30th December 2019, we are unable to obtain new stock of the above products, which Teledyne has been manufacturing since 2003. We will continue to supply these products after this date but only whilst our stocks last.

These products are being discontinued as it is no longer feasible to produce, the main factor is due to:

- **Requirements and associated costs of standards and certifications.**

The rigour of standards has increased significantly and the costs of applying these to legacy products is not feasible due to increased costs, as well as restricted access to services, such as clinical trials and reviews.

On behalf of Viamed and Teledyne I would like to thank our customers for their valued custom over the years. Should you wish to purchase before the deadline is imposed upon us, then please find product information enclosed. Please be aware there is limited stock available but we do have a wide range of alternatives which may be of interest to you.

Should you have any queries or require further information, please do not hesitate to contact me.

Yours sincerely

Steve Nixon
Director
