Dear Steve,

Thanks for your mail and question.

No objection for this change.

Best regards,

Pieter Decoene

Onderwerp: Proposed serial number format change

Hi Pieter

Do you mind if we add an extra digit to the serial number format of your sensor?

Current example: 90932187

Existing serial number format

1st digit represents the year e.g. 1 = 2011

2nd & 3rd digits represents the month e.g. 06 = June

4th - 8th digits = sequential serial number

Proposed change will allow use a 6 digit sequential serial number format. This will future proof your sensors!

1st digit represents the year e.g. 1 = 2011
2nd & 3rd digits represents the month e.g. 06 = June
4th - 9th digits = sequential serial number
