Dear Sir or Madam,

BlenderBuddy 2
A compact and clean addition to your blender

Viamed is pleased to introduce the **BlenderBuddy 2** to its Blender and accessories range.

The **BlenderBuddy 2** consists of a Maxtec Designed for Blenders (DFB) flowmeter, which is designed and calibrated specifically for air/oxygen blenders to provide increased accuracy compared to standard flowmeters, and has an acrylic block body attached with build-in oxygen port, which allows gas to be analysed safely and away from the patient.

- Flowmeter with dual-scale graduations providing increased accuracy at lower flow rates.
- Made from a high-quality acrylic block body and precision valve.
- Providing a sensor analysis port which may be used with any suitable oxygen analyzer to measure the gas concentration from the blender.
- It has a small continuous sensor bleed which enables gas analysis regardless of which outlet port is used on the blender.

The **BlenderBuddy 2** can be supplied on its own or with a MAXO2+A Oxygen Analyser.

Part Numbers

BlenderBuddy 2, DFB, Low Flow 0 - 15 lpm

0310211

BlenderBuddy 2, DFB with MaxO2+A Oxygen Analyser, Low Flow 0 - 15 lpm
