26 November 2019

Dear Sir or Madam,

Notice of Product Discontinuation – LIMITED STOCK AVAILABLE

Teledyne Analytical Instruments AX300 Oxygen Analyser and MX300 Oxygen Monitor

It is with regret that as of the 30th December 2019, we were unable to obtain new stock of the above products, which Teledyne has been manufacturing since 2003. We will continue to supply these products but only whilst our stocks last. We will continue to support the products with servicing, spare parts and accessories for a minimum of 7 years.

We would like to introduce you to the alternative oxygen analysers and monitors we have to offer.

- **Maxtec Handi+ Oxygen Analyser**
Ideal for spot-checking of oxygen percentage.

- **Maxtec MaxO₂+AE Oxygen Analyser**
For use anywhere an inline analyser is needed, when alarms are not deemed important. It is especially useful in conjunction with older ventilators or oscillators.

- **MySign O Oxygen Monitor**
High performance hand-held monitor for clinical, emergency and home ventilation environments.

- **Maxtec MaxO₂ ME Oxygen Monitor**
A low-maintenance oxygen monitor with adjustable high and low alarms. Also features Smart Alarm Mode which pre-sets the alarms to +/-3% of the current oxygen reading.

Please find enclosed leaflets detailing these products. Should you have any further questions regarding them, or any other devices in our oxygen monitoring range, please do not hesitate in contacting our sales team on 01535 634542 between 9:00am and 5:30pm Monday – Friday or email **sales@viamed.co.uk**

Yours sincerely

A handwritten signature in black ink that reads "Catrin". The script is cursive and fluid, with the 'C' being particularly large and looping.
