dear steave,

thank you for very quick reply.

super, i'll prepare our comments for this artwork.

have a nice day,

dusan

Subject: Updated labelling artwork for type 22D, P/N 3092 oxygen sensor

Dear Dusan

Further to your email addressed to Ryan, either Ryan or Jean will get back to you concerning the oxygen sensors supplied by Vandagraph (for surface use).

If I may I'll co-ordinate the artwork update for the sensor supplied Vandagraph Sensor Technologies (rebreather sensor, type 22D, P/N 3092)

I have attached the current datasheet for you sensor and on the last page you will find the current artwork for both the sensor and bag labelling.

Can you please advise the changes required and supply a copy of the artwork for your new logo. It looks like you email and web addresses have changed to .com rather than .cz ? Has the telephone number changed?

Once we receive the required edits from you, we will update the artwork for your approval. We will also advise you when we are able to implement the changes to production sensors.

Regards

Steve
