

# VM-2160 Pulse Oximeter Armband

**Protective, adjustable neoprene armband allows the patient or operator to wear the VM-2160 pulse oximeter on the arm. The armband is ideally suited to situations where other methods of mounting the instrument may not be available. Incorporates a velcro tab to secure excess sensor cable.**

Sensor shown has a standard length cable at 120 cm in length.  
A shorter, 30 cm cable is available for mounting on lower arm.
