2nd April 2020.

Steve,

John and I would like to take this opportunity to express our gratitude for your work in manufacturing sensors for us. The purpose of the sensors you are supplying is an essential component to the assemblies we manufacture in the Rapidly Manufactured Ventilator project (OxVent) being undertaken at the University of Oxford.

As such, every sensor has the potential to save multiple lives and there can be no greater reward for our endeavours than to know this.

This project is being undertaken on behalf of HM Government with the utmost urgency to increase the provision of mechanical ventilators for the NHS in response to the Covid-19 (corona virus) crisis.

Best regards,

John and Brent
