19<sup>th</sup> June 2020

**Inspiration Healthcare has agreed the acquisition of SLE, a global leader in Infant and Paediatric conventional and HFOV ventilators.**

Dear Valued Colleague,

Continuing the growth strategy of Inspiration Healthcare to add world class products and enter new markets. We are delighted to be able to inform you of this exciting development.

Having been in the business of infant ventilation for over 30 years, SLE has brought to market 6 generations of infant ventilators and respiratory devices. The SLE2000, 2000HFO and the SLE5000 have become synonymous in NICU's across the globe. The current flagship SLE6000 brings together conventional ventilation, HFO and NIV into a single workstation that also offers advanced monitoring and closed loop oxygen control.

The fusion of both companies provides the ideal platform for continued success and future development. A collaborative approach will see business as usual but provide for further support and exciting R&D projects.

SLE has a strong market presence in UK, Europe, Middle East/North Africa, Central Asia, Asia Pacific and Latin America. This compliments the current Inspiration global strategy and will ensure continued innovation and world class service.

We want to assure you that this does not change our current relationship with you, indeed it is business as usual, but as time goes on we anticipate that the merging of these two great companies will bring future added benefits.

We will follow up this announcement and speak to your personally; if you require any clarification in the meantime please do not hesitate to call us.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Toby Foster'.

Toby Foster  
Commercial Director
