Hi Jan

We received them yesterday, they are ready now and will be shipped today by UPS Express at our expense.

Please note that when we received them we only received 88 and not 100.

The missing sensors were

JJ126145 to JJ126154
JJ126162 to JJ126163

Regards

Steve

Hi Steve,

Sorry to chance this but when are you planning to send back the sensors that should be relabelled we are in big need off them here.

Kind regards

Jan Petersen

Good evening Jan

Starting Week 39 we plan to ship more sensors, so that by the end of Week 45 you will have 1200 sensors.

We will also try and ship the majority of your new order by the end of Week 48.

Regards

Steve

Hi Jan

I really hope that we can continue and increase supply, but I cannot control the on-going effects of COVID19.

Thank you for the additional order.

The first batch of sensors should be with you today.

Stay safe

Steve

Morning Steve,

I know planning is not easy at the moment but can I assume that you will continue to send aprosely 100 sensors a week from now on until we are more or less back on track.

Yes pleas send as soon each batch is ready instead off all in one go.

Also can I add another 500 sensors to the orders list.

Kind regards

Jan Petersen

Hi Jan

The following are your back orders:

Ref.
CST123555 Balance of 117 due
CST123556 500 sensors
CST124898 800 sensors
Total 1417 sensors

100 sensors are being shipped today, awaiting collection by UPS.

We are now working on the following batches to try and help. We should be able to start shipping these by the end of next week. Can we please ship these to you as soon as each batch is completed? There has been an increase in delays and parcels going astray for a few days with the couriers, so it is too much of a risk to ship 400 in one box.

- 1) Qty 100
- 2) Qty 117
- 3) Qty 100
- 4) Qty 100

The above will leave a balance of 900 sensors.

Regards

Steve

Hi Jan

100 sensor will be shipped to you tomorrow and we are working on another 200 now, which we may be able to get out to you by the end of next week.

Can I assume that you want them shipping by UPS Express?

Regards

Steve

Morning Steve.

Thanks for info about sensor shipment tomorrow.

Just trying to plan little bit if possible, does this mean you will start sending 100 sensors every week as forecasted earlier, 100 sensors this week is off course better than no sensors, but it is also like pieing in your pants to keep worm if we don't start to see more sensors regularly.

Kind regards

We will send out 100 sensors tomorrow.

Steve

So now its week 37 are we likely to get any sensors?

Steve we are a very short distance away from shutting the company down now. Without sensors we are unable to sell any rebreathers the factory is sitting idle and Jan is reaching the end of his ability to pay his staff for doing nothing.

So if there is any chance of sensors we are now very very desperate, my fear is if Jan closes the company down it wont open again.

Cheers

Dave
