Notice of Product Discontinuation
LIMITED STOCK AVAILABLE

Teledyne Analytical Instruments
AX300 Oxygen Analyser
and MX300 Oxygen Monitor

It is with regret that we are unable to obtain new CE marked stock of the above products, which Teledyne has been manufacturing since 2003. We will continue to supply these products with CE whilst our stocks last. After this, these products will only have FDA approval and can only be sold outside of the UK

and EU.

These products are being discontinued as it is no longer feasible to produce, the main factor is due to:

- **Requirements and associated costs of standards and certifications.**

The rigour of standards has increased significantly and the costs of applying these to legacy products is not feasible due to increased costs, as well as restricted access to services, such as clinical trials and reviews.

On behalf of Viamed and Teledyne I would like to thank our customers for their valued custom over the years. Should you wish to purchase before stocks are depleted, then please find product information below. Please be aware there is only a very limited stock available, but we do have a range of alternatives which may be of interest to you.
