Hi Kath

I hope this finds you good?

Sorry to chase but the sale/return now imminently expires, we will either have to commit to this and I'll req 3 more or return!

Please can you let me know which it is and if keeping quantity of hand and eye adapters required?

Many thanks

Peter

Hi Lorraine,

MIPM have completed their testing on Clinell Universal Wipes and Clinell Sporicidal Wipes and the outcome has been a positive one. Please find attached a statement regarding the suitability of Clinell Universal Wipes and Clinell Sporicidal Wipes for cleaning and disinfecting the TOF 3D Neuromuscular Transmission Monitor.

Hi Lorraine,

The Clinell declaration is still at an early stage. MIPM has agreed to perform the validation, but the wipes have only recently been purchased and until they have performed the tests, we cannot get anything in writing to declare compatibility.

I will forward you any further information that we receive in this regard as soon as it becomes available.

Subject: Update to PAQ2 re Infection Control

Hi Peter,

Following the receipt of further information from MIPM, I have been able to update the PAQ2 form with additional information concerning infection control, section 6.

Please see attached revision, dated today to supersede previous version. The updates are as follows:

The manufacturer, MIPM, has provisionally approved Gama Healthcare Clinell Universal Wipes based on assessment of the composition of the wipes and the device but has not yet issued a written declaration of compatibility. Once we receive this, we will forward it on.

Q6b: Also, please provide specific detail of the plastics used in all rigid external surfaces:

A: 1)The upper and lower casing including the battery cover is produced from amorphous thermoplastic alloy (polycarbonate + ASA)

2) The upper exposed surface of the membrane keypad is produced from textured hardcoat polyester film.

3) The transparent display protection window is produced from 2mm PMMA (Polymethyl methacrylate - acrylic glass).

The device is just going through reprocessing, which includes cleaning and disinfection. We should be able to despatch tomorrow or Monday to be with you by Tuesday at the latest. I will address it directly to you, care of MEMD.

Regards,
