

OPERATION

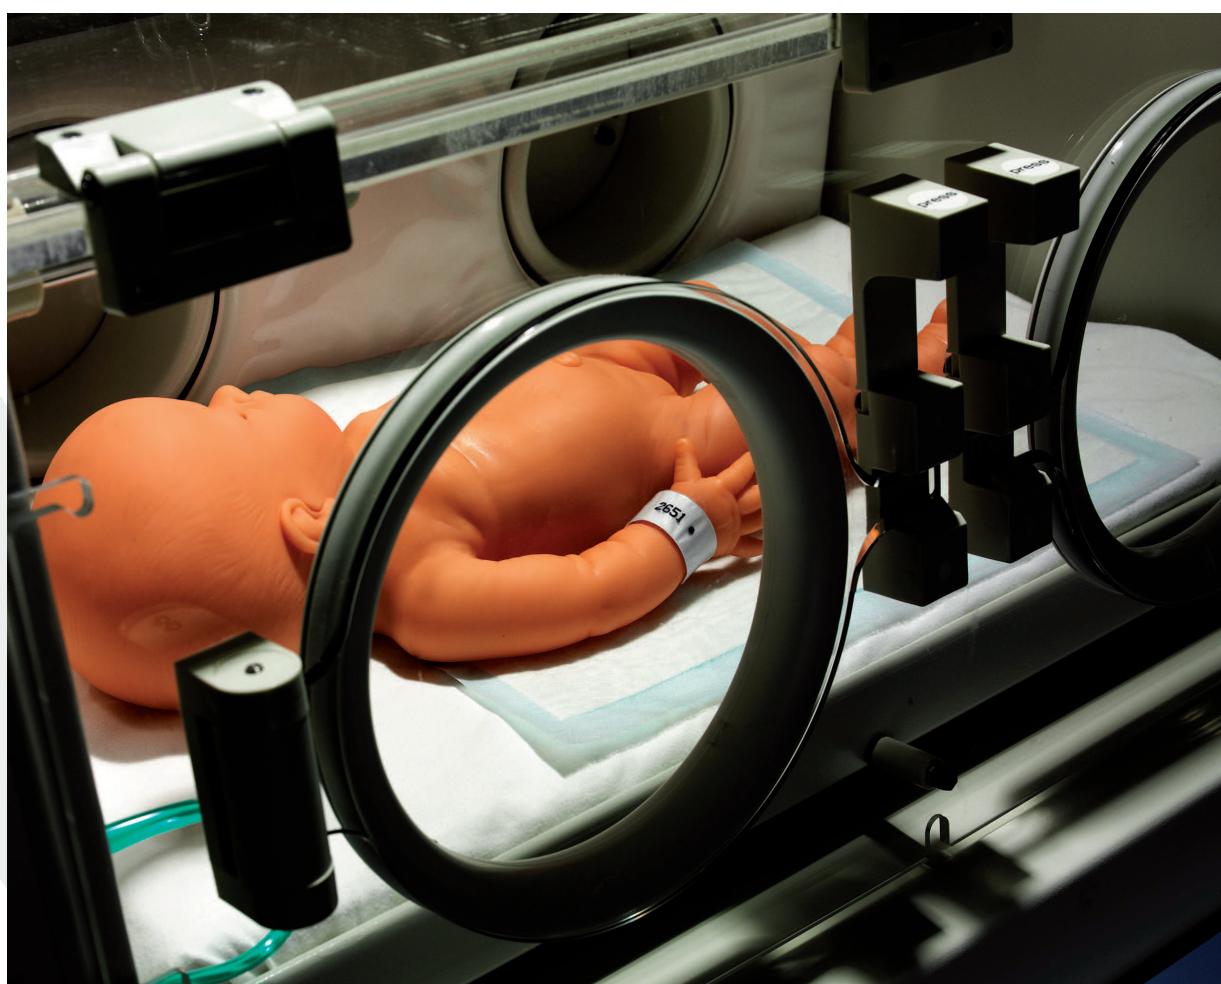

# DryMax®

## NEO

DryMax Neo is an absorbent pad designed specifically for use with premature babies. It is small in size and has a smooth side which the infant is placed on. The reverse side is made of plastic and maintains a clean and dry incubator. The underlay is soft, smooth and lint-free without high or hard edges. The pad works as a 'flat diaper' to be used in the incubator or other treatment areas. Thanks to the small size, it is easy to handle, position and change when needed. If the infant uses diapers, DryMax Neo can be used during diaper changes in the incubator, so as to protect the mattress and contribute to a more hygienic and drier environment.

DryMax Neo is a disposable product that is thrown away in a bin for ordinary garbage after use.

DryMax Neo is manufactured in Sweden.

<b>REF</b>	F22021
<b>Size</b>	33 x 28 cm
<b>Weight</b>	approx 15 g
<b>Applications</b>	Absorbs waterbased liquids such as urine, saline and blood
<b>Use</b>	Disposable product for single use, do not cut the product
<b>Sterile</b>	No
<b>Capacity</b>	0.4L tap water or 0.2L 0.9% NaCl
<b>Packaging</b>	250 pcs/innerbox x2 = 500 pcs/outerbox
