Hi Steve

I saw Liam is communicating with you.

All I wanted to highlight is that for the correct delivery address you will need to contact Richard Tuckwood from the MESU (cc'ed on Liam's email ) and ensure that the item will be send to MESU at city campus and not at the QMC campus (address where Liam is based )

Kind regards

Stefanos

**Subject:** DMARC violationRe: Medical Device Approval Request - Form Submission

Good morning Stefanos and Liam,

Just to let you know, as part of our Sale Or Return procedure we generate a MIA Call-Off Agreement form with all the details of the device and the trial.

This is supplied as a printed copy with the device and I can also email it as a PDF if required.

I will start the process of getting the item sent out. Usually, this is done via delivery to the Trust's Clinical Engineering Department to ensure they are happy with the item overall. I have cc'd Claire Foster from Clinical Engineering in on this; Claire can I ask will you be the correct person to send this to for receipt in for trial, and if not, can you advise a named person for the delivery?

Thanks in advance.

Regards,

Steve Hardaker  
Technical Support Manager  
Viamed Ltd.

**Please note: Viamed is enacting a coronavirus contingency plan to allow sales and admin staff to work from home, and I am now working remotely. Telephone calls to the main office will be answered remotely, but please continue to use email where possible.**

Good morning Liam

I am well thank you, I hope you are well too.

Many thanks for the good news.

I will ask the company to send over to me the item then, when they are ready.

Will they need to complete a MIA form or anything else before sending it to us?

I will contact you again with regards to this one after we decide to go ahead with a purchase

Kind regards

Stefanos

Hi Stefanos

Hope you are well?

Thanks for your request below. Judging by your comments, I don't think we need to approve this one. You can go ahead with the product demonstration and if you decide to purchase it, put in your request for approval. Think we've had these before so shouldn't take long.

Hope this helps.

Kind regards

**Liam Thompson**

No

**Research and Innovation Number:****Will the Device be Issued to Patient(s) in the Community?:**

No

**Acquisition Type:**

Loan

**Urgency:**

New request that needs scheduling for a specific date

**Impact:**

Service can be maintained as normal with mitigation in place

**Any Further Information:**

This device will be seen and examined in the office and not on a patient. Viamed UK does not have the ability to send a rep out at our Hospital and allows potential buyers to check, examine the device by hand on a sale or return agreement. This single item will be returned to the company after being seen, examined and a new MDAR will be submitted for the potential purchase of 6 items. Our Current O2 sensors (Viamed teledyne-6 in total) in clinical perfusion are all extremely old (15 years +) and they can become obsolete at any time causing service disruptions. Also they operate with a necessary disposable O2 sensor which now needs more frequent replacements, due to the hardware's age.
