Dear «UPOSITION»,

VersaStream CO₂ Sampling Lines for use with Viamed, Masimo, Phase-In & Spacelabs

Viamed are pleased to continually support the Emergency Services with the supply of VersaStream CO₂ sampling lines. An innovative solution for sidestream CO₂ monitoring, offering a **one-piece sampling solution with increased performance**.

VersaStream CO₂ sampling lines use the latest material technologies to allow the **complete removal of moisture and water** - even in cases of low temperatures and high humidity. They are very flexible and are suitable for both short-term and long-term applications.

Why VersaStream CO₂ sampling lines?

- **Cost-effective** alternative to Nafion® tubes - **from £8.80 per patient**
- The gas-selective non-porous material facilitates **fast and complete removal of condensation** from the sampling line
- The integrated bacterial filter **prevents contamination**
- **Reliable measured gas values**, due to negligible dead space volume of the filter - even in cases of high respiration rates
- **Integrated bacteria filter and water removal** reduces the number of patient circuit parts and speeds up patient monitoring preparation time
-

Part Number: **4420815**
Viamed VersaStream Oral/Nasal Sampling Line
Short Term < 24 hours Use
Box of 10

Also available in a number of variants including: single nasal sampling line, nasal cannula, nasal/oral cannula and a one-piece airway adapter sampling line.

Please find enclosed a leaflet outlining the range along with a price list. Should you have any further questions regarding this, or would like to obtain samples for evaluation, please do not hesitate in contacting our sales team on 01535 634542 between 9:00am and 5:00pm Monday - Friday.

Yours sincerely
