

# VERSASTREAM GAS SAMPLING LINES

Compatible for use with Capnographs and patient monitors with **Oridion** (Covidien, Nellcor, Medtronic, Philips, Masimo, Mindray, Zoll, Nihon Kohden...) technology.

# ORIDION

## LOCATION

Ideal for use in Emergency Care including Ambulances, Air Ambulances and Accident and Emergency...

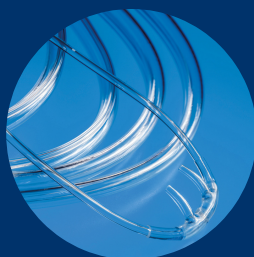

## APPLICATION

Available for Short Term (< 24 hours) use and Long Term (< 72 hours) applications

## CROSS REFERENCE

## ABOUT US!

Viamed are pleased to introduce VersaStream gas sampling lines as an innovative solution for sidestream gas monitoring with increased performance and low cost. These lines are a one-piece sampling line solution which is compatible to the Oridion FilterLine® range and are for use with Microstream® enabled capnograph and patient monitors.

VersaStream gas sampling lines use the latest material technologies to allow the removal of moisture and water – even in cases of low temperatures and high humidity. They are very flexible and are suitable for both short-term and long-term applications.

## BENEFITS

- **One-piece sampling line solution**
- **Integrated bacteria filter and water removal** reduces the number of patient circuit parts and speeds up patient monitoring preparation time
- **Reliable measured gas values**, due to negligible dead space volume of the filter – even in cases of high respiration rates
