Subject: MAX02+ for Medical Equipment Testing

Hi. I work at the Medical Engineering department at the University Hospital of North Tees and we are currently looking to purchase a new oxygen analyser for calibrating and verifying medical equipment such as O2/Air blenders. I have noticed that you sell multiple versions of the Max02+ model. Would you be able to let me know the differences between the models and which one would be most suitable for our application?

Kind Regards,
Dominic Duffy
