

Bulk Packing of Eye-masks either Maxtec or Neomask.

<p>For bulk packing eye-masks. Make up multi score box 61x47x47cm (at full height)</p>	
<p>Use cardboard protective strips, located next to the eye-masks.</p>	
<p>Also find a blue box bag located on shelf next to strips.</p>	

Cut down strips to fit inside the packing box and secure with tape. Place a strip in each corner of the box.

50 Eye-masks will fit in a full box. If sending fewer items, then make sure that you make the cardboard strips the correct length for the height of the box you will be shipping. If not using the full height of the box, score and reduce the box size before adding the protectors, so that you make them the same height.

Place the blue bag inside the box.

Scan all products that are to be packed in the box to the order you are working on, once done, neatly pack the box.

Once all the items have been scanned and added, fold over the bag and seal closed with some tape.

Add extra packaging if needed.

Then seal box ready for shipping.
