

Dear Business Partner,

Today we would like to inform you about a very positive development regarding Nufer Medical AG. We are planning to merge the company with ewimed Switzerland AG.

My name is Egon Wiest and since 2014 I have been the sole owner of Nufer Medical AG. ewimed Switzerland AG was founded in 2009 and is a subsidiary company of the Swedish Ankron Holding AB. This holding is also owned by myself and my family. ewimed is the largest provider of drainage systems for treatment of pleural effusion and ascites Europe-wide, with subsidiaries in Switzerland, Germany, Austria, Sweden, Denmark and Hungary.

The general environment in the medical technologies industry has become much more challenging, both at the European level in terms of regulatory approvals (MDR) and also locally (Swiss Authorized Representative). To remain competitive in this environment and to continue to aspire innovation, we have decided to combine the strengths of the two companies, Nufer and ewimed.

We aim to merge Nufer Medical AG and ewimed Switzerland AG finalising this in January 2024.

The new company will operate under the name ewimed Switzerland AG.

For you as our valued business partner nothing will change apart from the company name and address. Your contact persons will remain the same – all Nufer employees will be taken over by ewimed and will be at your disposal as before. The shared responsibility of Managing director will be with Mrs. Renate Marti and Mr. Daniel Urfer. We plan to expand our sales activities in Switzerland and internationally. In the area of service, we will continue to work for you and your products at the highest level, and we look forward to continuing our valued business interactions in the future.

Yours sincerely,

Egon Wiest

Nufer Medical AG

Nufer Medical is a well-known legally certified trading, development, production, and service company in the medical technology field. Nufer Medical started its activities in 1964 with infant incubators for heat supply, resuscitation and monitoring of newborns. Since then, range of products have been expanded substantially. Today is Nufer a leading provider in the fields of neonatology, paediatrics, heat therapy, obstetrics, anaesthesia, vascular surgery, intensive care, sonography, home care and biomedical test equipment.

Nufer exclusively represents well-known manufacturers and their products within Switzerland.

It owns its excellent reputation in the field of patient warming to many years of experience on the one hand and the development of the CERATHERM infant radiant warmer on the other. Sound advice, reliable service and individual trouble shooting are the special strengths. Nufer is a competent and reliable partner when it comes to implementing the legal requirements for the maintenance of your medical devices.

ewimed Group

ewimed is an ongoing expanding company from Germany that has been active in medical technology for over 30 years. ewimed specialises in the drainage of pleural effusions and ascites. Since the company was founded in 1991, the focus has been on the patient; creating and maintaining quality of life for patients is the primary goal. With offices in Germany, Austria, Hungary, Switzerland, Sweden and Denmark, ewimed is one of the largest European suppliers of drainage systems for the treatment of pleural effusions and ascites.

ewimed Switzerland AG was founded in 2009 and its employees have built up a reliable sales and service organization for clinics and patients. Through this service and cooperation with the medical staff in hospitals and in the home care sector, the use of the drainage systems is very safe, simple, time-saving and cost-effective. Patients benefit from improved quality of life and mobility, and clinics benefit from sustainable patient care. With a total of twenty-four employees at ewimed Switzerland AG, we ensure the timely instruction of the patients after discharge from the hospital and consistent quality of care for them.
