

Viamed Ltd – Health and Safety Statement

At Viamed Ltd, our commitment to managing health and safety effectively is integral to our operations, especially in relation to the delivery of medical CE marked products from the EU. Our approach is comprehensive, ensuring the safe handling and delivery of products, adherence to legal requirements, and efficient risk management.

1. Compliance with Legal and Product Standards: We supply CE marked medical products from Germany and the EU, ensuring compliance with EU health, safety, and environmental protection standards. The manufacturing company is responsible for meeting all medical legal requirements. We maintain a vigilant approach to compliance, liaising closely with our supplier to ensure continuous adherence to these standards.

2. ISO 13485:2016 Accreditation: Our organization is accredited to ISO 13485:2016, a testament to our dedication to quality management systems specific to the medical device industry. This accreditation involves rigorous external audits and assessments, ensuring our processes consistently meet the high standards required for the handling, distribution, and control of medical products. It underscores our commitment to maintaining the highest levels of safety and quality in every aspect of our operation.

3. Direct Management of Delivery Processes: We do not use contractors in our operations. All activities, from handling to processing deliveries of medical products, are managed by our trained staff. This direct control enables us to enforce strict health and safety protocols consistently across our operations.

4. Product Recall Procedures: We are responsible for managing product recalls in the UK. Our well-structured recall system includes swift notification protocols, effective recall execution, and clear communication with regulatory bodies. This process is designed to swiftly mitigate health and safety risks in the event of a product recall.

5. Continuous Risk Management and Improvement: Our commitment to health and safety extends to continuous risk assessment and management. This involves regular reviews of our processes and staying abreast of changes in health and safety regulations that could impact our operations. Our ISO 13485:2016 accreditation further ensures that our processes are not only compliant but are also subject to continuous improvement, reflecting the latest in safety and quality standards.

In summary, Viamed Ltd's approach to health and safety management in the delivery of medical products is rooted in rigorous compliance with international standards, direct control of our processes, and a proactive stance on risk management. Our ISO 13485:2016 accreditation is central to this approach, ensuring a consistent and high-quality standard in all our health and safety practices.
