## Dream Green: Delivering for our planet

---

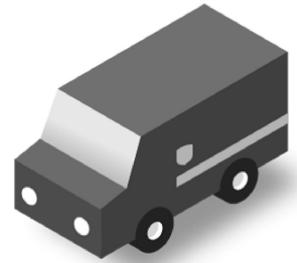

Sustainability is not just a promise, it's a plan of action. We at UPS remain focused on Greening our future. Here's how we make your parcels go from point A to B in a more sustainable way:

## Our facilities

- Actively increasing the number of European UPS Centres that use efficient LED lighting and rainwater barrels that collect water used for washing vehicles
- Deployed energy saving projects throughout our European buildings to save approximately 6 million kWh, which amounts to the yearly consumption of approximately 3,600 homes

## On the road

- Diversified our fleet - over 18,300 alternate fuel and advanced technology vehicles deployed worldwide to help lower our carbon footprint
- Added more efficient Duo-Trailers for long-haul deliveries which contribute to a 26% CO2 reduction compared to transporting the same volume with regular trucks

## Final mile solutions

- Purchased E-cars, E-quads and E-bikes for greener final mile deliveries across Europe
- Upgraded our delivery processes through more efficient route-finding systems

## Join us on our sustainable journey:

Enrol in our Paperless Commercial Invoice programme, increase efficiency by shipping to a UPS Access Point™ location and offset your CO2 emissions by selecting the UPS Carbon Neutral Option at checkout.

**Read More**

## Help offset the carbon footprint of your shipping

UPS will automatically double your carbon neutral contribution when shipping domestic or internationally.
