Disposable EEG Sensors
for monitoring the depth of anaestheisa as well as acquisition and transmission of biological EEG signals of anesthesia depth of patients

- BIS EEG Compatible with a large range of BIS™ monitors and modules (* see overleaf)
- GE Entropy Compatible
- Clinically tested, high-measurement accuracy
- Soft and bio-compatible material
- Latex-free

REF: MK-01

REF: MK-02

REF: MK-04

REF: MK-03

Disposable, single-use EEG sensors are specifically designed for anesthesiologists and medical professionals to monitor and assess the depth of anaesthesia in patients using the Bispectral Index™ (BIS) derived from the EEG signals. This provides real-time information about the patient`s consciousness and electrical brain activity during surgical procedures.

The range also include Entropy sensors for use with GE Entropy Module which measures these changes by quantifying the irregularity of EEG and FEMG signals.

VIAMED

Disposable EEG Sensors

Viamed Part Number	Type	Equivalent to Medtronic/Covidien Item No.
4610010	Adult REF MK-01 Pack of 25	186-0106
4610011	Paediatric REF MK-02 Pack of 25	186-0200
4610012	Bilateral Adult REF MK-04 Pack of 25	186-0212
4610013	Entropy REF MK-03 Pack of 25	M1174414 / Entropy EasyFit Sensor

* MK-01 and MK02 tested to be compatible with the following:

GE Heathcare/Datex Ohmeda S/5 Monitors
GE Heathcare/Datex Ohmeda FM Series Monitors
GE Heathcare/Datex Ohmeda Carescape Series Monitors
Philips Intellivue MP Series Patient Monitor Philips Intellivue MX Series Patient Monitor
Philips M1204A V24C Patient Monitor
Philips M1205A V26C Patient Monitor
BIS™ Module applied for Philips IntelliVue Device
