February 2012

Dear Madam,

Viamed continue to be the master European distributor for Teledyne Analytical Instruments, distributing Teledyne oxygen sensors - the industry leader in automotive sensors with patented rhodium cathode for unmatched reliability.

Viamed are pleased to introduce the new R-17A-LV Automotive Oxygen Sensor, which has been developed for use in Bosch equipment.

Viamed continue to offer **cost effective quality sensors** as well as our expertise gained from extensive knowledge and experience in oxygen monitoring.

Should you be using other non-Teledyne sensors you may wish to try Teledyne sensors due to the **low cost and reliability** that you can achieve. Viamed's complete range of Automotive Oxygen Sensors is available for immediate shipment; all sensors are tested prior to dispatch.

Please find enclosed a brief leaflet illustrating our main automotive oxygen sensors, please contact us for pricing.

automotive@viamed.co.uk

www.viamed-automotive.co.uk

Viamed are also able to provide box labels customised with distributors information, please contact us for further details.

Also...

Viamed have also introduced an **oxygen sensor disposal service**, as part of our Waste Management Policy. Should you wish to return any of your oxygen sensors (even if you have not purchased them from us) we will be pleased to dispose of them on your behalf in accordance with our ISO standards. Please contact us should you require information on how to send your depleted sensors to us.

Should you wish to place an order, or cannot find your oxygen sensor or equipment listed on the online cross reference, or would like to receive further information about anything included within this letter then please contact a member of our sales team on the number above.

Yours sincerely

Steve Hardaker
UK Sales Manager
