Subject: Viamed - Finger Pulse Oximeters

Dear Catrin Hird,

Viamed offer a range of Finger Pulse Oximeters to suit a variety of circumstances and price ranges. The Viamed range includes:

- VM-2101

Low profile design and lightweight the VM-2101 utilises 16 bit processing technology enabling a fast 'true reading' response and facilitates low perfusion capabilities. Including a large organic LED display which can be viewed in 4 rotations offering superb visibility in all lighting conditions, including direct sunlight.
Accuracy ARMS = 2.0%, +/- 1 S.D. = 1.86%

- NEW VM-2103

Utilising the same technology and casing as the VM-2101, the VM-2103 includes the same functionality and clinical accuracy but with the added safety of being encapsulated in a soft durable silicone casing make it both comfortable and robust.

- VM-2105

Incorporating the latest technology, the VM-2105 is hygienic and easy to clean with a complete soft silicone housing with no hinge assembly makes the unit extremely robust especially when in use in emergency situations.
Accuracy ARMS = 1.519%, +/- 1 S.D. = 1.513%

For your reference I have included a copy of each of the ranges marketing leaflets.

Should you require any further information please do not hesitate in contacting me.

Yours sincerely

Kind regards

Catrin Hird
