Dear Catrin Hollings,

Tom Thumb and NeoPEEP - Variable PEEP Neonatal Resuscitation Circuit

The Tom Thumb is an easy to use, compact and robust infant resuscitator that has been designed to enable safe, controlled and fatigue-free resuscitation. It utilizes the NeoPEEP neonatal resuscitation circuit which incorporates a variable PEEP valve and facilitates the delivery of safe and consistent breath patterns to neonates; by enabling delivery of consistent PEEP to assist in maintaining functional residual capacity.

This NeoPEEP will connect directly to a facemask or to standard endotracheal tubing. We also have connectors available to adapt the circuit to fit most other resuscitation units.

For your reference I have attached a leaflet which includes further information. Should you require any additional information, please do not hesitate in contacting me.

Yours sincerely

Kind regards

Catrin Hollings
