February 2013

Dear Madam,

**VM-2160 Hand-Held Pulse Oximeter**  
For spot checking or constant monitoring of  $\text{SpO}_2$

The VM-2160 is a robust and ergonomic hand-held pulse oximeter that has been designed with the most difficult conditions in mind.

It has the durability of a compact and lightweight hand held unit for spot-checking of  $\text{SpO}_2$ , but also has the power and functionality of a stand-alone pulse oximeter.

The VM-2160 incorporates adjustable high and low alarms for both the  $\text{SpO}_2$  and pulse rate with audible pulse tones, and is able to store and restore up to 48 hours of patient trend data, enabling the unit to also be used at the bedside for continual patient monitoring.

**Also available the 4000 Series  $\text{SpO}_2$  Sensors**

- Soft silicone finger sensors
- Reusable finger sensors
- Reusable ear sensors
- Disposable sensors
- Extension & adapter cables

These sensors are compatible with most OEM pulse oximeters and patient monitors including:  
**Nellcor, Ohmeda, Datex, CSI, BCI, Novametrix and Nonin** and more...

Please refer to the leaflet and price list enclosed for further details and the specification on the VM-2160, should you require further information on this or the 4000 Series  $\text{SpO}_2$  Sensors please do not hesitate to contact our sales team on; 01535 634542.

Yours sincerely

Steve Hardaker  
UK Sales Manager
