Workplace Waste and Recycling Questionnaire Helping us understand and improve waste management at work

Starting March 31, 2025, new recycling regulations in England will require businesses with 10 or more employees to separate their waste into specific categories for collection:

Dry Recyclables: This includes materials such as glass, metal, plastic, paper, and cardboard. These should be placed in designated recycling bins.

Food Waste: All food waste must be collected separately from other waste types.

These measures aim to standardize recycling practices, reduce landfill waste, and increase recycling rates across the country.

At present we do most of this but not all. Please fill in the questions below so we can see what we need to do and where.
