July 2012

Dear Mr Comuth,

### High performance and versatile anaesthetic agent monitoring

Viamed is continuing to develop and expand its range of high performance products to provide its customers with innovative solutions to their needs. The VM-2500-MG Multigas Monitor is no exception, the ultra-compact, light and easy to handle design of the VM-2500-MG Multigas Monitor is the perfect flexible and mobile monitor for identifying and quantifying the five most important anaesthetic agents as well as other gases and parameters.

Key features of the VM-2500 Capnography range from Viamed include:

- **Innovative micro-optic technology**
- **Direct mainstream measurement without time delay**
- Reaches **full-scale accuracy** within **1 minute** to full specification
- **No service or calibration required**; reduces running costs and down time.
- **Bright and clear organic LED display**

Please find enclosed a leaflet outlining the specifications of the unit along with a price list. Should you have any further questions regarding this, or any of our other products, please do not hesitate in contacting me.

Yours sincerely

Steve Hardaker  
UK Sales Manager
