

Nexus

Supplier Catalogue Import

File Format (Version 1.02)

General File Notes

1. File is Comma Separated (CSV) ASCII Text.
2. All fields are separated with a comma delimiter.
3. Each record should end with Carriage Return or Carriage Return, Line Feed.
4. Catalogue Item Detail uniqueness is based on 'Item Code' and 'QOM'.
5. The first row should preferably contain the field names as defined below.
6. The import file must contain the mandatory fields, recommended fields (if possible) and optionally any of the other fields in any order. Nexus allows you to map your import file fields to the fields in the system through the import wizard.
7. Field Type: A = Alphanumeric N = Numeric (<max length>).

Catalogue Item Detail Record

Field No.	Field Name	Field Type	Field Details	Format
1	Item Code	A (50)	Mandatory	
2	Description	A (500)	Mandatory	
3	Long Description	A (2000)		
4	UOM Code	A (20)	Mandatory	
5	UOM Description	A (50)	Recommended	
6	QOM	N (9)	Mandatory	0
7	List Price	N (15)		0.00#####
8	Order Multiple	N (9)		0
9	Brand	A (200)		
10	Manufacturer Name	A (200)		
11	Manufacturer Item Code	A (50)		
12	EAN Code	A (50)		
13	GTIN Code	A (14)		
14	HIBC	A (50)		
15	NJR	A (1)		T = True F = False
16	COSHH	A (1)		T = True F = False
