4	Does the person responsible for the management have the authority to implement actions, and reports directly to top management with the need for these actions	Y	YES
5	Are reviews of the management system undertaken regularly and the results, and actions, relayed throughout the organisation.	Y	YES
6	Are all required actions are undertaken timely and closed out where appropriate.	Y: issue previous	YES
7	Are all output requirements in such a format, that verification against inputs is applicable and appropriate, and that Fitness-for-Purpose is validated.	Y	YES
8	Are actions recorded against verifications completed in a timely and responsible manner.	Y	YES
9	Are validation processes in place, and that they are determined in accordance with the relevant requirements.	Y	YES
10	Are design changes recorded and all the relevant information filed in the appropriate places.	in intranet	YES
C RESOURCE MANAGEMENT			
1	Has top management established a mechanism for identifying and providing required resources, training etc.	Y training records	YES
2	Does this includes existing and new personnel.	Y	YES

INTERNAL PROCESS VERIFICATION

3	Has top management identified the competency levels and attributes required for existing and new personnel.	YES	Y Infrastructure
4	Is the competency of personnel monitored and verified, and the appropriate records are maintained	YES	Y
5	Is the need for equipment, plant, services etc. identified and acted upon where necessary.	YES	Y
6	Has the basic working infrastructure has been planned with conformity to requirements in mind.	YES	Y
5	Check validations of unknown process control criteria.	YES	Y
6	Are there adequate mechanisms in place for the identification, handling etc. of product through all stages.	N/A	N/A
7	Are the controls in place to safeguard customer property adequate for full protection against loss damage etc.	YES	Barcode tracking
8	Is the process for monitoring and measurement of product is in place at all stages throughout the production process.		Returns tracking
9	Is the process for control of measuring equipment adequate for the monitoring of product verifications.	YES	QAT records
10	Are validity processes are in place to safeguard product integrity.	Yes	Calibration index
D PRODUCT REALISATION			
1	Is the planning process for the realisation of product undertaken at the relevant stages.	YES	Y
2	Does planning identify documentation, testing and other such activities as required, and that all appropriate records are maintained.	YES	Infrastructure
3	Are all customer requirements being addressed, including statutory and regulatory, and that the capabilities are identified to meet those requirements.	YES	Y
4	Establish that mechanisms are in place to review all customer requirements prior to any commitments by the organisation.		Order checking
5	Check that there are adequate arrangements for customer communications and feedback.	YES	Feedback Reviews
4	Is collation and analysis of all relevant data determined and effective, and corrective actions identified.	YES	Y Issues
5	Are these actions completed in a timely and adequate manner, and are these actions part of continual improvements.	YES	Issues Reviews
6	Does the organisation have preventive measures in place to control potential non-conformities.	YES	Y Barcode system
7	Are all the above actions are reviewed adequately?	YES	
E DESIGN & DEVELOPMENT			
1	Are procedures in place to ensure adequate planning of product design, and that all relevant stages are identified.	YES	Y
2	Are the interfaces and assignments of responsibilities identified.	YES	Y
3	Are all input requirements determined, and documentation identified.	YES	Y
4	Are all output requirements in such a format, that verification against inputs is applicable and appropriate, and that Fitness-for-Purpose is validated.	YES	Y No Review Design
5	Are actions recorded against verifications completed in a timely and responsible manner.	YES	Y
6	Are validation processes in place, and that they are determined in accordance with the relevant requirements.	YES	Y
7	Are design changes recorded and all the relevant information filed in the appropriate places.	YES	Y Infrastructure
F PRODUCT PROVISION			
1	Are supplier profiles adequate and appropriate for the organisation, and are they monitored, for their ability to provide the requirements, and is this monitoring controlled.	YES	Supplier Review
2	Is all the required information necessary forwarded to suppliers in the correct format, and that is this authorised prior to order placement.		Cost Market Review
3	Are goods and services received correct to the requirements stipulated.	YES	Y
4	Are the provisions available for control of production and service, including procedures and equipment etc.	YES	Infrastructure / Overhaul / QAT
5	Check validations of unknown process control criteria.	YES	Y

INTERNAL PROCESS VERIFICATION

6	Are there adequate mechanisms in place for the identification, handling etc. of product through all stages.	Y	YES
7	Are the controls in place to safeguard customer property adequate for full protection against loss damage etc.	Returns tracking	
8	Is the process for monitoring and measurement of product in place at all stages throughout the production process.	Y	YES
9	Is the process for control of measuring equipment adequate for the monitoring of product verifications.	Calibration index	Yes
10	Are validity processes are in place to safeguard product integrity.	QA	YES
G PROCESS MONITORING			
1	Are mechanisms are in place to monitor all relevant processes, including customer satisfaction, and to verify these against known criteria.	Feedback / complaints	YES
2	Are controls in place for non-conforming product and processes, are adequate to prevent unintended uses.	Reviews	YES
