November 2012

Dear Mrs Hollings,

### **Reusable Oxygen Hoods**

*Designed for use with paediatric patients - for the short-term, stable delivery of oxygen*

An oxygen hood is probably the most common traditional short-term method of delivering extra oxygen to paediatric patients who require it; maintaining stable  $\text{FiO}_2$  around the patient's head, whilst leaving the body accessible for care. Viamed manufacture a range of oxygen hoods either with or without side ports, and in addition to the range detailed in the enclosed leaflet – we can manufacture oxygen hoods to specific requirements.

Should the above be of interest, please do not hesitate to contact our sales team on **(01535) 634542** or email **info@viamed.co.uk**, if you have any queries or require further information.

Yours sincerely

Steve Hardaker  
UK Sales Manager
