Dear Heidi,

I'm not sure if its you or Ned I should be asking.

We are Trying to get TFDA to sell the VM-2500 in Taiwan,  
as part of this we are required to send engineering drawings/schematics for the VM-2500-S + VM-2500-M.

This is not something we would normally like to give out however I'm lead to believe that Bluepoint has had to supply something similar for registration with Japan.

Have you got something I can provide for this?

I appologise if Steve has already asked you for this,

Regards

Derek Lamb
