① I asked Claire to help us with regards to staff and what we are doing wrong. She feels her role doesn't need replacing in that there isn't enough work and we are over staffed. We shouldn't fill her position. Main problem as far as existing staff is concerned is Cathy. ~~the~~ Claire is scared to ask/talk to her as she is so short/snappy with everyone. She feels Cathy is centre of what ~~they~~ do - they have to cish her for info and goods out dimensions carriage etc. Least unapproachable person is company and most scary. Unpredictable. Office group is set in its ways and find it difficult to accept new people. Problem of two people who have two different ideas teaching one person different things. She feels Catrin + Lisa are very close and it has made her feel on the outside. The work is really unchallenging and boring especially the projects that Steve has given them. At present it is just clutter.

in to data in 5

~~the facts~~

② I feel the job is really more (an end we need someone who just needs work at not career.

The roll is too boring to give to a young enthusiastic person with skills. We need someone who wants a job and doesn't care if its ~~monotonous~~ monotonous boring and awful filling. So the people we interview - its the people who are remarkable that will fit the roll not the people who interview well.

need to sit down with staff and discuss leaving attitude at home and not take it out on people at work.
