- Ultrasonically welded tabs for secure fastening

**Part Number: 1114015**

Large

32 - 38 cm occipital - frontal circumference

**Part Number: 1114016**

Medium

26 - 32 cm occipital - frontal circumference

**Part Number: 1114017**

Small

20 - 26 cm occipital - frontal circumference

The NeoMask has been designed to assure optimum comfort and eye protection for neonates during phototherapy treatment. The single-piece, wrap-around design is secured at two points, which can be independently adjusted to prevent unwanted movement and allows a comfortable and secure fit.

The large eye-protection pad has been ergonomically designed to reduce pressure and increase light protection. The headband; however, allows blue light to penetrate, so that the head continues to receive phototherapy treatment.

All phototherapy eye masks from Viamed are supplied in packs of 20

### Other phototherapy products available from Viamed

An alternative to the traditional phototherapy eye mask is the phototherapy light shield. These light shields are manufactured by Viamed using Amber 300™ material, and are available in a variety of standard designs and sizes. Light shields can also be designed to meet exact specifications, should the standard range not meet individual requirements.
