price lists

Pressure Management Gel Pads & Positioners

The Pressure Management range includes:

- Arm & Elbow Positioners
- Contoured Positioners
- Flat Bottom Positioners
- Head Positioners
- Lower Extremities
- Operating Table Surfaces
- Speciality Pads

The Pressure Management Gel Pads & Positioners were designed with the patient in mind. The viscoelastic polymer dry flotation pads are intended to help provide comfort for the patient while also offering extra guarded protection from pressure sores. During surgical procedures of any significant time (1½ hours or greater) a patient is at risk of decubitae. With the application of a Pressure Management pad the occurrence of these ulcers are greatly reduced. This is due to the unique properties of these products; it is not a liquid but a solid material that is extremely unlikely to bottom out whilst evening out patient weight distribution.

The Pressure Management range includes products suitable for arm and elbow protection, head positioning, lower extremities and operating table surfaces, plus many more. These products are sealed in a "skin" that is designed to reduce shear and friction and are reusable, X-ray translucent and latex free.

Pressure Management Gel Pads & Positioners Product Information

Pressure Management pads and positioners have been tested to be 0.0 on the primary irritation index and are considered a non-irritant according to procedures outlined in FHSA guidelines, 16 CFR, Section 1500.41.

Pressure Management pads and positioners are also considered non-cytotoxic and meet the requirements of the Elution Test, ISO 10993.

1. Suggested Heating/Cooling Techniques - Gel Pads

▪ Heating

If warming units are going to be used in conjunction with the Pressure Management Viscoelastic Polymer Pads & Positioners the following is recommended.

If possible bring the temperature of the Pressure Management product above room temperature in a blanket/warming cabinet. Place the product on top of the patient warming devices so as to receive the most benefit from the 'gel' pad. Whenever possible we strongly recommend that the Pressure Management products are not covered so as optimize the pressure reducing and sheer reduction properties.

Pressure Management products will always take on the temperature of the atmosphere it is in (room temperature).

▪ Cooling

Pressure Management products are inherently heat dissipating, if a cooling device is used the 'gel' pad will not hinder its functionality. As previously stated Pressure Management products will always take on the temperature of its surroundings which will help in aiding to cool a patient.

2. Recommended use and care

▪ Cleaning

Use of standard operating room cleaning agents is recommended. Long soaks are not recommended.

The light cloud products are resposable and lightly coated foam that should be wiped but not saturated with cleanser. If any nicks or tears occur the product should be disposed of and replaced.

▪ Sharps

Avoid using sharp instruments that may puncture the outer film. Do not drag pads and positioning devices across sharp edges.

▪ Warming

Pressure Management gel pads may be warmed in warming cabinets or by immersing in water to make the pads approach normal human body temperature.

DO NOT AUTOCLAVE or ATTEMPT TO STERILIZE the products.

Gel pads should not be exposed to high heat or flame.

▪ Storage

Store pads flat whenever possible. Do **NOT** store in cold places.

▪ Moving Patients

It is not recommended to move patients while on the pads. Moving patients while on pads may result in tearing or puncturing of pads.

▪ Protocol

A Health Care Professional should evaluate the patient pre-operatively to determine the use of gel pads or positioners.

▪ Warranty

All Pressure Management Polymer products are covered by a two year manufacturers defective replacement policy. If the pad is deemed defective due to manufacturing process it will be replaced at no cost.

3. Technical Specification – Gel Pads

Tensile Strength (psi)	20-40 psi
Elongation (%)	700-950%
Modulus at 100% Elongation	5 psi

Tear Strength, Die C (lb./in)	9 lb./in
Glass Transition Temperature (Tg1 °C)	-57.5°C
Shore Rebound	12
Bayshore Rebound (%)	8-9.5%
Shore Hardness ("000")	25-75
Compression Load (force) Deflection (psi)	
@25%	6.1 psi
@50%	38.8 psi
Compression Set % of Thickness	
@25%	0.33%
@50%	0.66%

The Pressure Management gel belongs to a class of polymers commonly known as polyurethane. It is a special type of polyurethane called viscoelastic polyurethane polymer. It is unique in that it is formulated to exhibit many of the properties found in nonelastomers as well as numerous benefits of an elastomeric gel. The Pressure Management version of the gel polymer was developed to provide superior shock attenuation and absorbency while exhibiting very high elasticity and low durometer hardness. The Pressure Management gel has elongation of up to 900%, affording unparalleled shock absorption and excellent vibration/pressure dampening properties. At the same time, users experience an extremely high degree of comfort, due to the polymer gel's low durometer hardness, which makes it soft to the touch yet still strong enough to absorb pressures of hundreds of pounds per square inch. The Pressure Management gel and skin were created and matched to simulate human fatty tissue.

UK PRICE LIST Blue Diamond Gel Lower Extremities

Part number	Model	Description		Price £
2710250	BD2280	Gel Foot/Heel/Sole Protector. Has a Velcro strip on the back. Helps reduce pressure from the force of patients pushing against the foot brace. 6" (w) x 15" (l) x 1/4" (h).		£24.00
2710251	BD2300	Small Gel Knee Crutch Pad. A versatile pad for more than just knee crutch supports. It can be use on many specialty frames or with arm shields. 9" (w) x 11" (l) x 3/8" (h).		£25.00
2710252	BD2310	Medium Gel Knee Crutch Pad. Designed to reduce pressure to the knee and calf areas whilst the patient's leg is in a knee crutch. 11" (w) x 17" (l) x 1/4" (h).		£32.00
2710253	BD2310-5	Medium Gel Knee Crutch Pad. Designed to reduce pressure to the knee and calf areas whilst the patient's leg is in a knee crutch. 11" (w) x 17" (l) x 1/2" (h).		£60.00
2710254	BD2320	Large Gel Knee Crutch Pad. Provides full knee and calf protection whilst a patient's lower extremity is in a knee crutch. It offers superior protection during longer procedures. 20" (w) x 20" (l) x 1/2" (h).		£112.75
2710255	BD2326	Allen Style Boot Liner Gel Pads (Pair). Gel pad designed specifically to fit the Allen Medical boot stirrups. It has pockets that wrap around the boot to keep the pad from falling off. It also has Velcro to keep it in place.		£110.00
2710256	BD2295	Gel Heel Elevators (Pair). Encapsulated with a thermoformed film so that no additional surface tension is created. These elevators are ideal when concern for the patient's heels is a factor. It will raise the heel slightly, not affecting blood flow to the feet. 6" (l) x 2" (h).		£87.50

2710257	BD2325	Universal Gel Stirrup Pads (Pair). Bell shaped stirrup pad is ½" thick and designed to fit in all standard boot stirrups on the market. Velcro securing straps that wrap around the back of the stirrup prevent 'flop over' of the gel pad.		£91.50
2710258	BD2290	Gel Clamshell Heel/Elbow Protector. Designed to cradle bony prominences. It is used in numerous ways from, long-term dermal care, to post surgical recovery, during procedures. In conjunction with 'candy cane' post pads it provides excellent lower extremity protection while the patient's feet are cradled and legs are pushing against metal poles. Incorporates a Velcro securing strap.		38.50
2710259	BD2335	Candy Cane Gel Foot Straps (Pair). Pair of heavy-duty deluxe straps for candy cane stirrups. The straps are 24" for added flexibility, with a 12" gel strip to protect the back of the heel/ankle as well as the sides of the foot.		£53.00
2710260	BD2330	Candy Cane Gel Stirrup Pad (Pair). These cylindrical gel pads are 24" (l).		£121.00
2710109	BD2140-25	Gel Table/Hip Pad. - Lightweight 20" (w) x 20" (l) x ¼" (h).		£55.00
2710205	BD2245	Toboggan Arm/Leg Shield Gel Liner. Has Velcro attachments to affix to your arm shield. Sized to fit 6", 8" & 10" arm shields.		£37.50
