Dear Mary,

I am just following up with regards to your request for a VM-2500-S sidestream CO2 monitor for the purpose of a trial.

As I mentioned in a previous email, Viamed is introducing a new range of sampling lines and accessories, the VersaStream series. Please see attached information and price list.

VersaStream sampling lines are a huge leap forwards, using a high-tech innovative material for the sampling line itself that completely removes all moisture, along with a compact integrated bacterial filter. These single-patient use sampling lines are effective for at least 24 hours of continuous use, whereas many competitor products are rated to around 6 hours. We also have a range of long-term lines coming in the near future that can be used for a minimum of 72 hours continuous monitoring.

The attached leaflet and price list details the complete range, however, the first stage of the product roll-out is to introduce the following 4 sampling lines and 2 airway adapters, which are due to arrive with us around the 13th February:

Nasal Cannula (twin prong)

p/n 4420801 - Adult, 2m, box of 25  
p/n 4420802 - Paediatric, 2m, box of 25  
p/n 4420803 - Infant, 2m, box of 25

Nasal Sampling Line (single nostril sampling plug)

p/n 4420800 - Adult, 2m, box of 25

Airway adapter sampling line (sampling line with integrated airway adapter)

p/n 4420821 - Adult/paediatric, 2m, box of 25  
p/n 4420822 - Infant/neonatal, 2m, box of 25

In previous discussions with Keith Taylor, you mentioned that you would like around 20 sets of lines in order to facilitate an effective trial, we are happy to allow you to trial the different types of sampling lines, so I just need to know which of the above lines would be of most use to you?

If you can advise me before the 13th February, we should be able to ship the capnograph and accessories to you the week of Monday 17th February so as to allow you to start the trial.

If you need to speak to Keith directly, his number is 07790 568878. Thanks in advance and I look forward to hearing from you.

Regards,

Steve Hardaker
